

# PVM-1953MD/2053MD

## SERVICE MANUAL

*US Model*  
*Canadian Model*

PVM-1953MD  
Chassis No. SCC-H31A-A

*AEP Model*  
PVM-2053MD  
Chassis No. SCC-H29B-A

### SPECIFICATIONS (PVM-1953MD)

#### Video signal

Color system	NTSC, PAL
Resolution	600 TV lines
Aperture correction	0 dB – +6.0 dB
Frequency response	LINE 9.0 MHz (–3 dB) RGB 10.0 MHz (–3 dB)
Synchronization	AFC time constant 1.0 msec.

Raster size stability	H 1.0%, V 1.5%
High voltage regulation	4.0%

CRT	SMPTE-C phosphor
Color temperature	6500K/5600K/USER (3200K – 10000K, factory setting is 6500K)

#### Picture performance

Overscan	20% overscan of CRT effective screen area
Normal scan	7% overscan of CRT effective screen area
Underscan	5% underscan of CRT effective screen area
Linearity	Horizontal: Less than 5% (typical) Vertical: Less than 5% (typical)
Convergence	Central area 0.7 mm (typical) Peripheral area 1.3 mm (typical)

#### Inputs

Y/C IN	4-pin mini DIN connector See the pin assignment on the page 2.
VIDEO IN	BNC connector 1 Vp-p $\pm$ 6 dB, sync negative
AUDIO IN	phono jack, –5 dBu, more than 47k ohms
R/R-Y IN, G/Y IN, B/B-Y IN	BNC connector
R, G, B channels	0.7 Vp-p $\pm$ 6 dB
Sync on green	1.0 Vp-p Sync negative, 75 ohms terminated

— Continued on next page —

TRINITRON® COLOR VIDEO MONITOR  
**SONY®**

# PVM-1953MD

R-Y, B-Y channels	0.7 Vp-p $\pm 6$ dB
Y channel	1.0 Vp-p $\pm 6$ dB (Standard color bar signal of 75% chrominance)
EXT SYNC IN	BNC connector composite sync 4 Vp-p $\pm 6$ dB, negative

## Outputs

Y/C OUT	4-pin mini DIN connector, 75 ohms terminated
VIDEO OUT	BNC connector, 75 ohms terminated
AUDIO OUT	phono jack
R/R-Y OUT, G/Y OUT, B/B-Y OUT	BNC connector, 75 ohms terminated
EXT SYNC OUT	BNC connector, 75 ohms terminated
DC OUT	5 V/1 A
Speaker output	Output level 0.8 W

## Remote Input

REMOTE 1	8-pin mini DIN <i>See the pin assignment on the page 2.</i>
RS-232C	9-pin D-sub <i>See the pin assignment on the page 2.</i>

## General

Power requirements	120 V AC, 50/60 Hz 1.6 A <i>Capable of 100 to 240V operation</i>
Operating temperature range	0 – 35°C
Storage temperature range	–10 – +40°C
Humidity	0 – 90%
Dimensions	Approx. 450 × 457.5 × 503 mm (w/h/d) (17 <sup>3</sup> / <sub>4</sub> × 18 <sup>1</sup> / <sub>8</sub> × 19 <sup>7</sup> / <sub>8</sub> inches) not incl. projecting parts and controls
Mass	Approx. 30 kg (66 lb 2 oz)
Accessory supplied	AC power cord (1) AC plug holder (1) Splash proof covers (2) Control panel cover (1) Panel hinges (2) Remote Control Connector 8-pin mini DIN (1) Operating Instructions (1) Interface Manual for Programmers (1) Quick Reference Card (1) Double-sided adhesive tapes (4)

0 dBu = 0.775 Vr.m.s.

Design and specifications are subject to change without notice.

## Pin assignment

### Y/C IN connector (4-pin mini DIN)

Pin No.	Signal	Description
1	Y-input	1 Vp-p, sync negative, 75 ohms
2	CHROMA sub-carrier-input	300 mVp-p, burst Delay time between Y and C: within 0±100 nsec., 75 ohms
3	GND for Y-input	GND
4	GND for CHROMA-input	GND

## (CAUTION)

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR CARBON PAINTED ON THE CRT, AFTER REMOVING THE ANODE.

## WARNING!!

AN ISOLATION TRANSFORMER SHOULD BE USED DURING ANY SERVICE TO AVOID POSSIBLE SHOCK HAZARD, BECAUSE OF LIVE CHASSIS.

THE CHASSIS OF THIS RECEIVER IS DIRECTLY CONNECTED TO THE AC POWER LINE.

## SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY SHADING AND MARK  $\Delta$  ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY. CIRCUIT ADJUSTMENTS THAT ARE CRITICAL TO SAFE OPERATION ARE IDENTIFIED IN THIS MANUAL. FOLLOW THESE PROCEDURES WHENEVER CRITICAL COMPONENTS ARE REPLACED OR IMPROPER OPERATION IS SUSPECTED.

## ATTENTION!!

APRES AVOIR DECONNECTE LE CAP DE L'ANODE, COURT-CIRCUITER L'ANODE DU TUBE CATHODIQUE ET CELUI DE L'ANODE DU CAP AU CHASSIS METALLIQUE DE L'APPAREIL, OU AU COUCHE DE CARBONE PEINTE SUR LE TUBE CATHODIQUE OU AU BILNDAGE DU TUBE CATHODIQUE.

## ATTENTION!!

AFIN D'EVITER TOUT RISQUE D'ELECTROCUTION PROVENANT D'UN CHÂSSIS SOUS TENSION, UN TRANSFORMATEUR D'ISOLEMENT DOIT ETRE UTILISÉ LORS DE TOUT DÉPANNAGE.

LE CHÂSSIS DE CE RÉCEPTEUR EST DIRECTEMENT RACCORDÉ À L'ALIMENTATION SECTEUR.

## ATTENTION AUX COMPOSANTS RELATIFS À LA SÉCURITÉ!!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET PAR UNE MARQUE  $\Delta$  SUR LES SCHÉMAS DE PRINCIPES, LES VUES EXPLOSÉES ET LES LISTES DE PIÉCES SONT D'UNE IMPORTANCE CRITIQUE POUR LA SÉCURITÉ DU FONCTIONNEMENT. NE LES REMPLACER QUE PAR DES COMPOSANTS SONY DONT LE NUMÉRO DE PIÉCE EST INDIQUÉ DANS LE PRÉSENT MANUEL OU DANS DES SUPPLÉMENTS PUBLIÉS PAR SONY. LES RÉGLAGES DE CIRCUIT DONT L'IMPORTANCE EST CRITIQUE POUR LA SÉCURITÉ DU PRÉSENT MANUEL. SUIVRE CES PROCÉDURES LORS DE CHAQUE REMPLACEMENT DE COMPOSANTS CRITIQUES, OU LORSQU'UN MAUVAIS FONCTIONNEMENT EST SUSPECTÉ.

## SAFETY CHECK-OUT

### (US Model only)

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.
4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
5. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
6. Check the line cords for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
7. Check the B+ and HV to see if they are at the values specified. Make sure your instruments are accurate; be suspicious of your HV meter if sets always have low HV.
8. Check the metal trim, metallized knobs, screws, and all other exposed metal parts for AC leakage.  
Check leakage as described below.

### LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5mA (500 microampers). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufactures' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

### HOW TO FIND A GOOD EARTH GROUND

A cold-water pipe is guaranteed earth ground; the cover-plate retaining screw on most AC outlet boxes is also at earth ground. If the retaining screw is to be used as your earth-ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms. If a cold-water pipe is not accessible, connect a 60-100 watts trouble light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side of the line, the lamp should light at normal brilliance if the screw is at ground potential. (See Fig. B)

Fig. A. Using an AC voltmeter to check AC leakage.

Fig. B. Checking for earth ground.

## SECTION 1

### GENERAL

#### 1-1. GENERAL OF PVM-1953MD

## Features

The operating instructions mentioned here are partial abstracts from the Operating Instruction Manual. The page numbers of the Operating Instruction Manual remain as in the manual.

PVM-1953MD

#### Picture

##### HR (High Resolution) Trinitron picture tube

HR Trinitron tube provides a high resolution picture. Horizontal resolution is more than 600 TV lines at the center of the picture.

##### Comb filter

When NTSC video signals are received, a comb filter activates to increase the resolution, resulting in fine picture detail without color spill or color noise.

##### Beam current feedback circuit

The built-in beam current feedback circuit assures stable white balance.

#### Inputs

##### Two color systems available

The monitor can display PAL and NTSC signals. The appropriate color system is selected automatically.

##### Analog RGB/component input connectors

Analog RGB or component (Y, R-Y and B-Y) signals from video equipment can be input through these connectors. Press the RGB/COMPONENT A/B select button on the front panel and select RGB or component signals from the on-screen menu.

##### Y/C input connector (S input connector)

The video signal, split into the chrominance signal (C) and the luminance signal (Y), can be input through this connector, eliminating the interference between the two signals, which tends to occur in a composite video signal, assuring video quality.

##### External sync input connectors

When the external RGB or component signal is input and sync signal is set to external in the on-screen menu, the monitor can be operated on the sync signal supplied from an external sync generator.

##### Automatic termination (only terminals with the $\sim$ mark)

The BNC input connectors on the rear panel are terminated at 75 ohms inside, when no cable is connected to the loop-through output connectors. When a cable is connected to an output connector, the 75-ohm termination is automatically released.

#### Functions

##### On-screen menus

You can set color temperature, CHROMA SET UP, and other settings by using the on-screen menus.

##### Overscan mode

The display size is enlarged by approximately 20% and the center part of the screen is easier to watch.

##### Underscan mode

The signal normally scanned outside of the screen can be monitored in the underscan mode.

#### Note

When the monitor is in the underscan mode, the dark RGB scanning lines may appear on the top edge of the screen. These are caused by an internal test signal, rather than the input signal.

##### Split function

The display splits into two parts (upper and lower). The upper part of the screen monitors the signal fed through the RGB/COMPONENT A input connectors and lower part of the screen monitors the signal fed through the RGB/COMPONENT B input connectors. You can compare the two screens.

##### Caption vision (Closed Caption) decoder

When a signal with Caption Vision is input, the caption is superimposed on the screen. You can select ON or OFF and set the caption type on the on-screen menu.

##### Auto/manual degaussing

Degaussing of the screen can be performed automatically when the power is turned on, or manually by pressing the DEGAUSS button.

##### Five menu languages

You can select the language used for on-screen menus from the five languages.

##### Splash proof cover(s) and control panel cover

Splash proof covers that protect the ventilation holes from splashes (of medicines, etc.) and a control panel cover that protects the control buttons on the front panel from undesired touching are supplied.

##### Quick Reference Card

The Quick Reference Card is supplied to help you understand the menu configuration and operating method. You can attach the supplied double-sided adhesive tapes on the rear of the card.

##### EIA standard 19-inch rack mounting

By using an MB-502B (for PVM-1353MD) or SLR-103 (for PVM-1953MD) Mounting Bracket (not supplied), the monitor can be mounted in an EIA standard 19-inch rack. For details on mounting, see the instruction manual of the mounting bracket kit.

# Location and Function of Parts and Controls

PVM-1953MD

## Front Panel

### 1 Tally indicator

This indicator lights up when the video camera connected to this monitor is selected, indicating that the picture is being recorded. The tally control connection is needed.

For the pin assignment, see "Specifications" on page 14.

### 2 ① POWER switch and indicator

Depress to turn the monitor on. The indicator will light up in green. To turn the power off, press this again.

### 3 REMOTE indicator

This indicator lights up in the conditions below:

- When PRESET is set to ON in the menu.
- When REMOTE (RS-232C) is set to REMOTE ONLY or REMOTE & LOCAL in the menu, or
- When REMOTE ON is set via the REMOTE 1 terminal.

### 4 ▽ VOLUME control

Turn this control clockwise or counterclockwise to obtain the desired volume.

### 5 ① CONTRAST control

Turn clockwise to make the contrast stronger and counterclockwise to make it weaker.

### 6 🌈 PHASE control

This control is effective only for the NTSC color system. Turn clockwise to make the skin tones greenish and counterclockwise to make them purplish.

### 7 ③ CHROMA (chrominance) control

Turn clockwise to make the color intensity stronger and counterclockwise to make it weaker.

### 8 ☀ BRIGHT (brightness) control

Turn clockwise for more brightness and counterclockwise for less.

### 9 ① APERTURE control

Turn clockwise for more sharpness and counterclockwise for less. When the control is set to MIN, the picture becomes flat without need for corrections.

#### Note

The APERTURE, CHROMA, PHASE control settings have no effect on the pictures of RGB signals.

### 10 MENU (EXIT) button

Press to make the menu appear. Press to return to the previous screen in the menu.

### 11 ENTER (SELECT) button

Press to decide a selected item in the menu.

### 12 ↑ (+) / ↓ (-) buttons

Press to move the cursor (▶) or adjust selected value in the menus.

**13 OVERSCAN button**

Press (light on) for overscanning. The display size is extended by approximately 20% so that the center of screen is easier to watch. By pressing the button again, the display returns to the normal size (light off).

**14 UNDERSCAN button**

Press (light on) for underscanning. The display size is reduced by approximately 5% so that four corners of the raster are visible. By pressing the button again, the display returns to the normal size (light off).

**15 RESET button**

During menu adjustments, press to reset the setting in the menu.

**16 DEGAUSS button**

Press this button momentarily. The screen will be demagnetized.  
Wait for 10 minutes or more before activating this button again.

**Note**

The picture rolls vertically while the screen is being demagnetized.

**17 LINE A/B select buttons**

Press to select a signal (light on).

A: Press to monitor the signal fed through the LINE A input connectors.

B: Press to monitor the signal fed through the LINE B input connectors.

**18 RGB/COMPONENT A/B select buttons**

Press to select a signal (light on).

A: Press to monitor the signal fed through the RGB/COMPONENT A input connectors.

B: Press to monitor the signal fed through the RGB/COMPONENT B input connectors.

**19 SPLIT button**

When you select RGB signals fed through the RGB/COMPONENT A and RGB/COMPONENT B input connectors, press this button (light on) to split the display into two parts (upper and lower), and monitor the both RGB signals simultaneously.

**Note**

Make sure the signals fed through the RGB/COMPONENT A and RGB/COMPONENT B input connectors are synchronized.

# Location and Function of Parts and Controls

PVM-1953MD

## Rear Panel

(The  $\sim$  mark indicates automatic termination.)

### 1 AC IN socket

Connect the supplied AC power cord to this socket.

### 2 LINE A connectors

Line input connectors for the composite video and audio signals and their loop-through output connectors. To monitor the input signal fed through these connectors, press LINE A select button (light on) on the front panel.

#### VIDEO IN (BNC)

Connect to the video output connector of a video equipment, such as a VTR or a color video camera. For a loop-through connection, connect to the video output connector of another monitor.

#### VIDEO OUT (BNC)

Loop-through output of the VIDEO IN connector. Connect to the video input connector for a VTR or another monitor.

When the cable is connected to this connector, the 75-ohms termination of the input is automatically released, and the signal input to the VIDEO IN connector is output from this connector.

#### AUDIO IN (phono jack)

Connect to the audio output connector of a VTR or to a microphone through a suitable microphone amplifier. For a loop-through connection, connect to the audio output connector of another monitor.

#### AUDIO OUT (phono jack)

Loop-through output of the AUDIO IN connector. Connect to the audio input connector of a VTR or another monitor.

### 3 LINE B connectors

Separated Y/C input connectors, audio input connectors, and corresponding loop-through output connectors.

To monitor the input signal fed through these connectors, press LINE B select button (light on) on the front panel.

#### Y/C IN (4-pin mini DIN)

Connect to the Y/C separate output connector of a VTR, video camera or other video equipment.

#### Y/C OUT (4-pin mini DIN)

Loop-through output of the Y/C IN connector. Connect to the Y/C separate input connector of a VTR or another monitor.

When the cable is connected to this connector, the 75-ohms termination of the input is automatically released, and the signal input to the Y/C IN connector is output from this connector.

#### AUDIO IN (phono jack)

Connect to the audio output connector of a VTR or to a microphone through a suitable microphone amplifier. For a loop-through connection, connect to the audio output connector of another monitor.

#### AUDIO OUT (phono jack)

Loop-through output of the AUDIO IN connector. Connect to the audio input connector of a VTR or another monitor.

**4 RGB/COMPONENT A connectors**

RGB signal or component signal input connectors and their loop-through output connectors.

To monitor the input signal fed through these connectors, press the RGB/COMPONENT A select button (light on) on the front panel.

Then select one out of four items in the RGB A SYSTEM menu to set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal.

*For the operation through the menus, see pages 8 to 10.*

**R/R-Y IN, G/Y IN, B/B-Y IN (BNC)**

When "RGB-INT SYNC" or "COMP-INT SYNC" is selected in the RGB A SYSTEM menu, the monitor operates on the sync signal from the G/Y channel.

**To monitor the RGB signal**

Connect to the analog RGB signal output connectors of a video camera.

**To monitor the component signal**

Connect to the R-Y/Y/B-Y component signal output connectors of a Sony Betacam SP™ camcorder.

**R/R-Y OUT, G/Y OUT, B/B-Y OUT (BNC)**

Loop-through outputs of the R/R-Y IN, G/Y IN, B/B-Y IN connectors.

When the cables are connected to these connectors, the 75-ohms termination of the inputs is automatically released, and the signal inputs to the R/R-Y IN, G/Y IN, B/B-Y IN connectors are output from these connectors.

**To output the analog RGB signal**

Connect to the analog RGB signal input connectors of a video printer or another monitor.

**To output the component signal**

Connect to the R-Y/Y/B-Y component signal input connectors of a Sony Betacam SP VTR.

**AUDIO IN (phono jack)**

Connect to the audio output connector of video equipment when the analog RGB or component signal is input.

**AUDIO OUT (phono jack)**

Loop-through outputs of the AUDIO IN connector.

**EXT SYNC (external sync) IN (BNC)**

When this monitor operates on an external sync signal, connect the signal from a sync generator to this connector.

To use the sync signal fed through this connector, select "RGB-EXT SYNC" or "COMP-EXT SYNC" in the RGB A SYSTEM menu.

**EXT SYNC (external sync) OUT (BNC)**

Loop-through output of the EXT SYNC IN connector.

Connect to the external sync input connector of video equipment to be synchronized with this monitor.

When the cable is connected to this connector, the 75-ohms termination of the input is released, and the signal input to the EXT SYNC IN connector is output from this connector.

**5 Ground (⏏/⊕) terminal**

Connect a GND cable.

**6 RGB/COMPONENT B connectors**

RGB signal or component signal input connectors.

To monitor the input signal fed through these connectors, press the RGB/COMPONENT B select button (light on) on the front panel.

Then select one out of four items in the RGB B SYSTEM menu to set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal.

*For the operation through the menus, see pages 8 to 10.*

**R/R-Y IN, G/Y IN, B/B-Y IN (BNC)**

When "RGB-INT SYNC" or "COMP-INT SYNC" is selected in the RGB B SYSTEM menu, the monitor operates on the sync signal from the G/Y channel.

**To monitor the RGB signal**

Connect to the analog RGB signal output connectors of a video camera.

**To monitor the component signal**

Connect to the R-Y/Y/B-Y component signal output connectors of a Sony Betacam SP camcorder.

**AUDIO IN (phono jack)**

Connect to the audio output connector of video equipment when the analog RGB or component signal is input.

**EXT SYNC (external sync) IN (BNC)**

When this monitor operates on an external sync signal, connect the signal from a sync generator to this connector.

To use the sync signal fed through this connector, select "RGB-EXT SYNC" or "COMP-EXT SYNC" in the RGB B SYSTEM menu.

**7 REMOTE connectors****RS-232C (D-sub 9-pin)**

Connect to the RS-232C control connector of other equipment. You can operate the monitor with the control command from the equipment.

*For the details, see the supplied Interface Manual for Programmers.*

**REMOTE 1 (8-pin mini DIN)**

Connect to the tally output connector of a control console, effects, etc. The tally indicator on the front panel will be turned on and off by the connected equipment.

You can also connect a remote controller using this connector.

*For the pin assignments of these connectors, see "Specifications" on page 2.*

**DC OUT 5V/1A connector**

You can use this connector as a power source for the other equipment.

DC 5V/1A is output.

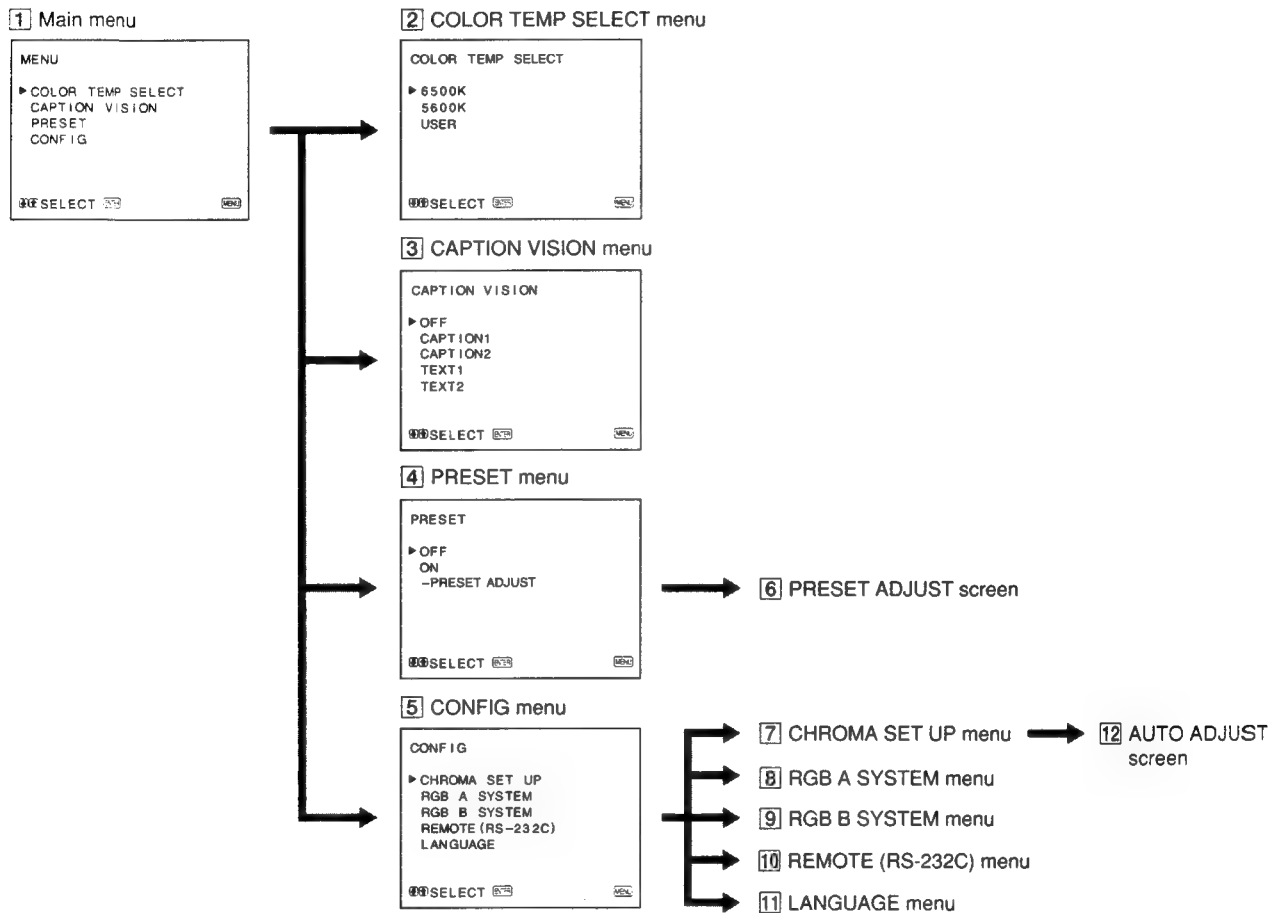

# Using On-Screen Menus

PVM-1953MD

## Menu Configuration

The flow chart shows the different levels of on-screen menus that you can use to make various adjustments and settings.

For details of each menu, see pages 9 and 10.

## User Service Mode

## Operating through Menus

There are five buttons for menu operations on the front panel of the monitor. To display the main menu, first press MENU (EXIT). The buttons you can use appear at the bottom of the menu screen.

### Functions of the buttons

Button	To select menu item	To adjust selected menu item
MENU EXIT	return to the previous menu.	return to the previous menu.
ENTER SELECT	decide a selected item.	select an item.
↑ +	move the cursor (▶) upwards.	increase selected value.
↓ -	move the cursor (▶) downwards.	decrease selected value.
RESET		reset current adjustment value to the factory setting.

(The above items in white type correspond to the marks in the menu.)

## The Contents of Menu Items

The following sentences show the details of each menu items.

[ ] indicates the factory setting position.

### 1 Main menu

Select an item and press the ENTER (SELECT) button to go to the following menu.

### 2 COLOR TEMP SELECT menu

Select the color temperature from among 6500K, 5600K and USER. USER is set to 6500K in the factory setting. You can adjust or change the color temperature in USER mode (a measuring instrument is needed).

[6500K]

#### Note

The color temperature of the USER mode can be adjusted in the range from 3200K to 10000K.

You can adjust the color temperature of the USER mode in the USER COLOR TEMP ADJUST menu ([13]) of the user service mode.

For the details, see "USER COLOR TEMP ADJUST menu ([13])" on page 10.

### 3 CAPTION VISION menu

To display closed captions, select ON and the type of caption you would like.

[OFF]

### 4 PRESET menu

You can preset each control to a desired level and set it. If you set PRESET to ON, the REMOTE indicator lights up and the controls on the front panel do not work. The monitor operates with the internal memory settings. For adjustment, select the PRESET ADJUST screen.

[OFF]

### 5 CONFIG menu

Select an item for adjustment of the monitor.

### 6 PRESET ADJUST screen

Adjust CONTRAST, BRIGHT, CHROMA, PHASE, VOLUME, APERTURE in the PRESET menu.

### 7 CHROMA SET UP menu

Set to ON to adjust the internal decoder for CHROMA and PHASE (NTSC signal only) after AUTO ADJUST screen ([12]).

[OFF]

### 8 RGB A SYSTEM menu

To monitor the signal fed through the RGB/COMPONENT A connectors, set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal in this menu.

[RGB-INT SYNC]

# Using On-Screen Menus

PVM-1953MD

## 9 RGB B SYSTEM menu

To monitor the signal fed through the RGB/COMPONENT B connectors, set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal in this menu.  
[RGB-INT SYNC]

## 10 REMOTE (RS-232C) menu

Select one out of following three modes.

REMOTE OFF:

You can adjust settings and controls by the buttons and controls on the front panel.

RS-232C connector does not function.

REMOTE ONLY:

You can adjust settings and controls through the RS-232C connector.

Buttons and controls on the front panel, except the menu operation ones, do not function.

REMOTE & LOCAL:

You can adjust settings and controls both through the RS-232C connector and the front panel buttons.

Controls on the front panel do not function.

[REMOTE OFF]

## 11 LANGUAGE menu

You can select the language used for on-screen menus from the following five languages (English, German, French, Italian, Spanish).

[ENGLISH]

## 12 AUTO ADJUST screen

Select the color bar signal (full, SMPTE, EIA) and press the ENTER (SELECT) button to start automatic adjustment for CHROMA and PHASE. For these adjustments to be valid, you must select ON in CHROMA SET UP menu ([7]).

## User Service Mode

The user service mode is useful when adjusting the settings and controls except for the above.

To enter the user service mode, press and hold the MENU (EXIT) button until the following USER SERVICE 1 appears.

To move to the second page of the mode, select "NEXT PAGE" and to return to the first page of the menu, select "PREVIOUS PAGE".

## 13 USER COLOR TEMP ADJUST menu

The value of adjustment in this menu works only when "USER" is selected in the COLOR TEMP SELECT menu ([2]).

ADJUST GAIN:

Adjusts the color balance (gain) of the USER mode.

ADJUST BIAS:

Adjusts the color balance (bias) of the USER mode.

COLOR TEMP RANGE:

When you adjust the color temperature in the USER mode, select a color temperature range before adjusting ADJUST GAIN and ADJUST BIAS. If the adjusted color temperature is between 3200K and 5000K, select "3200K-5000K." If the adjusted color temperature is between 5000K and 10000K, select "5000K-10000K." [5000K-10000K]

## 14 COLOR SYSTEM DISPLAY menu

Select the color system display mode. In AUTO, the kind of color system being used appears on the screen each time you change the signal input. [AUTO]

## 15 358 TRAP FILTER menu

Color spill or color noise may be eliminated if you select ON (NTSC signal only). Normally set it to OFF. [OFF]

## 16 SPLIT PHASE menu

When the SPLIT function is activated, if the lower side picture (the signal fed through the RGB/COMPONENT B input connectors) has some discrepancy of location with the upper side picture, adjust the SPLIT PHASE menu.

Each time you press the ↑(+) button, the lower side picture moves left.

### Note

When the adjustment is made in the menu, the skew error will occur on the top of the lower side picture.

## 17 COMPONENT LEVEL menu

Select the component level from among three modes.

NTSC/SMPTE: for 100/0/100/0 signal

BETA 7.5: for 100/7.5/75/7.5 signal

BETA 0: for 100/0/75/0 signal [BETA 7.5]

## 18 NTSC SETUP LEVEL menu

Select the NTSC setup level from two modes. The 7.5 setup level is mainly used in north America. The 0 setup level is mainly used in Japan. [7.5]

## 19 SUB CONTROL screen

You can finely adjust the controls on the front panel. CONTRAST, PHASE, CHROMA and BRIGHT controls have clicks at the center of their adjustment range. You can adjust the setting of the click position with this feature.

## 20 V HOLD screen

Adjust the vertical hold if the picture rolls vertically.

### Note

If the rolling of the picture prevents you from watching the screen, select an input that has nothing connected.

# Power Sources

PVM-1953MD

## House Current

Connect the supplied AC power cord to the AC IN socket on the rear panel and to a wall outlet.

To connect an AC power cord securely with the AC plug holder

To remove the AC power cord

Pull out AC plug holder by squeezing the up and down sides.

# Attaching the Splash Proof Covers

PVM-1953MD

In order to protect the ventilation holes from splashes (of medicines, etc.), attach the splash proof covers (supplied) as shown below.

1

Making sure the arrows on the cover are facing down, hook the nails on the upper edge into the ventilation holes.

**Note**

Attach the splash proof covers to all them ventilation holes.

2

Push up the nails on the bottom edge and fit the cover into the lowest ventilation holes.

Attach the both covers to the left and right sides.

# Attaching the Control Panel Cover

In order to protect the control buttons on the front panel from undesired touching, attach the supplied control panel cover.

1

Attach the panel hinges to the left and right grips from the inner side.

2

Fit the bosses on the both sides of the control panel cover into the lower holes of the panel hinges with bending the control panel cover a little.

# Features

PVM-2053MD

## Picture

### HR (High Resolution) Trinitron picture tube

HR Trinitron tube provides a high resolution picture. Horizontal resolution is more than 600 TV lines at the center of the picture.

### Comb filter

When NTSC video signals are received, a comb filter activates to increase the resolution, resulting in fine picture detail without color spill or color noise.

### Beam current feedback circuit

The built-in beam current feedback circuit assures stable white balance.

## Inputs

### Two color systems available

The monitor can display PAL and NTSC signals. The appropriate color system is selected automatically.

### Analog RGB/component input connectors

Analog RGB or component (Y, R-Y and B-Y) signals from video equipment can be input through these connectors. Press the RGB/COMPONENT A/B select button on the front panel and select RGB or component signals from the on-screen menu.

### Y/C input connector (S input connector)

The video signal, split into the chrominance signal (C) and the luminance signal (Y), can be input through this connector, eliminating the interference between the two signals, which tends to occur in a composite video signal, assuring video quality.

### External sync input connectors

When the external RGB or component signal is input and sync signal is set to external in the on-screen menu, the monitor can be operated on the sync signal supplied from an external sync generator.

### Automatic termination (only terminals with the $\sim$ mark)

The BNC input connectors on the rear panel are terminated at 75 ohms inside, when no cable is connected to the loop-through output connectors. When a cable is connected to an output connector, the 75-ohm termination is automatically released.

## Functions

### On-screen menus

You can set color temperature, CHROMA SET UP, and other settings by using the on-screen menus.

### Overscan mode

The display size is enlarged by approximately 20% and the center part of the screen is easier to watch.

### Underscan mode

The signal normally scanned outside of the screen can be monitored in the underscan mode.

### Note

When the monitor is in the underscan mode, the dark RGB scanning lines may appear on the top edge of the screen. These are caused by an internal test signal, rather than the input signal.

### Split function

The display splits into two parts (upper and lower). The upper part of the screen monitors the signal fed through the RGB/COMPONENT A input connectors and lower part of the screen monitors the signal fed through the RGB/COMPONENT B input connectors. You can compare the two screens.

### Auto/manual degaussing

Degaussing of the screen can be performed automatically when the power is turned on, or manually by pressing the DEGAUSS button.

### Five menu languages

You can select the language used for on-screen menus from the five languages.

### Splash proof cover(s) and control panel cover

Splash proof covers that protect the ventilation holes from splashes (of medicines, etc.) and a control panel cover that protects the control buttons on the front panel from undesired touching are supplied.

### Quick Reference Card

The Quick Reference Card is supplied to help you understand the menu configuration and operating method. You can attach the supplied double-sided adhesive tapes on the rear of the card.

### EIA standard 19-inch rack mounting

By using an MB-502B (for PVM-1453MD) or SLR-103 (for PVM-2053MD) Mounting Bracket (not supplied), the monitor can be mounted in an EIA standard 19-inch rack. For details on mounting, see the instruction manual of the mounting bracket kit.

# Location and Function of Parts and Controls

PVM-2053MD

## Front Panel

### 1 Tally indicator

This indicator lights up when the video camera connected to this monitor is selected, indicating that the picture is being recorded. The tally control connection is needed. For the pin assignment, see "Specifications" on page 16.

### 2 POWER switch and indicator

Depress to turn the monitor on. The indicator will light up in green. To turn the power off, press this again.

### 3 REMOTE indicator

This indicator lights up in the conditions below:

- When PRESET is set to ON in the menu.
- When REMOTE (RS-232C) is set to REMOTE ONLY or REMOTE & LOCAL in the menu, or
- When REMOTE ON is set via the REMOTE 1 terminal.

### 4 VOLUME control

Turn this control clockwise or counterclockwise to obtain the desired volume.

### 5 CONTRAST control

Turn clockwise to make the contrast stronger and counterclockwise to make it weaker.

### 6 PHASE control

This control is effective only for the NTSC color system. Turn clockwise to make the skin tones greenish and counterclockwise to make them purplish.

### 7 CHROMA (chrominance) control

Turn clockwise to make the color intensity stronger and counterclockwise to make it weaker.

### 8 BRIGHT (brightness) control

Turn clockwise for more brightness and counterclockwise for less.

### 9 APERTURE control

Turn clockwise for more sharpness and counterclockwise for less. When the control is set to MIN, the picture becomes flat without need for corrections.

### Note

The APERTURE, CHROMA, PHASE control settings have no effect on the pictures of RGB signals.

### 10 MENU (EXIT) button

Press to make the menu appear. Press to return to the previous screen in the menu.

### 11 ENTER (SELECT) button

Press to decide a selected item in the menu.

### 12 (+) / (-) buttons

Press to move the cursor (▶) or adjust selected value in the menus.

**13 OVERSCAN button**

Press (light on) for overscanning. The display size is extended by approximately 20% so that the center of screen is easier to watch. By pressing the button again, the display returns to the normal size (light off).

**14 UNDERSCAN button**

Press (light on) for underscanning. The display size is reduced by approximately 5% so that four corners of the raster are visible. By pressing the button again, the display returns to the normal size (light off).

**15 RESET button**

During menu adjustments, press to reset the setting in the menu.

**16 DEGAUSS button**

Press this button momentarily. The screen will be demagnetized.  
Wait for 10 minutes or more before activating this button again.

**Note**

The picture rolls vertically while the screen is being demagnetized.

**17 LINE A/B select buttons**

Press to select a signal (light on).

A: Press to monitor the signal fed through the LINE A input connectors.

B: Press to monitor the signal fed through the LINE B input connectors.

**18 RGB/COMPONENT A/B select buttons**

Press to select a signal (light on).

A: Press to monitor the signal fed through the RGB/COMPONENT A input connectors.

B: Press to monitor the signal fed through the RGB/COMPONENT B input connectors.

**19 SPLIT button**

When you select RGB signals fed through the RGB/COMPONENT A and RGB/COMPONENT B input connectors, press this button (light on) to split the display into two parts (upper and lower), and monitor the both RGB signals simultaneously.

**Note**

Make sure the signals fed through the RGB/COMPONENT A and RGB/COMPONENT B input connectors are synchronized.

# Location and Function of Parts and Controls

PVM-2053MD

## Rear Panel

### Note

Before connecting the video equipment, see "Important safeguards/notices for use in the medical environments" on page 3.

(The  $\sim$  mark indicates automatic termination.)

### 1 AC IN socket

Connect the supplied AC power cord to this socket.

### 2 LINE A connectors

Line input connectors for the composite video and audio signals and their loop-through output connectors. To monitor the input signal fed through these connectors, press LINE A select button (light on) on the front panel.

#### VIDEO IN (BNC)

Connect to the video output connector of a video equipment, such as a VTR or a color video camera. For a loop-through connection, connect to the video output connector of another monitor.

#### VIDEO OUT (BNC)

Loop-through output of the VIDEO IN connector. Connect to the video input connector for a VTR or another monitor.

When the cable is connected to this connector, the 75-ohms termination of the input is automatically released, and the signal input to the VIDEO IN connector is output from this connector.

#### AUDIO IN (phono jack)

Connect to the audio output connector of a VTR or to a microphone through a suitable microphone amplifier. For a loop-through connection, connect to the audio output connector of another monitor.

#### AUDIO OUT (phono jack)

Loop-through output of the AUDIO IN connector. Connect to the audio input connector of a VTR or another monitor.

### 3 LINE B connectors

Separated Y/C input connectors, audio input connectors, and corresponding loop-through output connectors.

To monitor the input signal fed through these connectors, press LINE B select button (light on) on the front panel.

#### Y/C IN (4-pin mini DIN)

Connect to the Y/C separate output connector of a VTR, video camera or other video equipment.

#### Y/C OUT (4-pin mini DIN)

Loop-through output of the Y/C IN connector. Connect to the Y/C separate input connector of a VTR or another monitor.

When the cable is connected to this connector, the 75-ohms termination of the input is automatically released, and the signal input to the Y/C IN connector is output from this connector.

#### AUDIO IN (phono jack)

Connect to the audio output connector of a VTR or to a microphone through a suitable microphone amplifier. For a loop-through connection, connect to the audio output connector of another monitor.

#### AUDIO OUT (phono jack)

Loop-through output of the AUDIO IN connector. Connect to the audio input connector of a VTR or another monitor.

**4 RGB/COMPONENT A connectors**

RGB signal or component signal input connectors and their loop-through output connectors.

To monitor the input signal fed through these connectors, press the RGB/COMPONENT A select button (light on) on the front panel.

Then select one out of four items in the RGB A SYSTEM menu to set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal.

*For the operation through the menus, see pages 10 to 12.*

**R/R-Y IN, G/Y IN, B/B-Y IN (BNC)**

When "RGB-INT SYNC" or "COMP-INT SYNC" is selected in the RGB A SYSTEM menu, the monitor operates on the sync signal from the G/Y channel.

**To monitor the RGB signal**

Connect to the analog RGB signal output connectors of a video camera.

**To monitor the component signal**

Connect to the R-Y/Y/B-Y component signal output connectors of a Sony Betacam SP™ camcorder.

**R/R-Y OUT, G/Y OUT, B/B-Y OUT (BNC)**

Loop-through outputs of the R/R-Y IN, G/Y IN, B/B-Y IN connectors.

When the cables are connected to these connectors, the 75-ohms termination of the inputs is automatically released, and the signal inputs to the R/R-Y IN, G/Y IN, B/B-Y IN connectors are output from these connectors.

**To output the analog RGB signal**

Connect to the analog RGB signal input connectors of a video printer or another monitor.

**To output the component signal**

Connect to the R-Y/Y/B-Y component signal input connectors of a Sony Betacam SP VTR.

**AUDIO IN (phono jack)**

Connect to the audio output connector of video equipment when the analog RGB or component signal is input.

**AUDIO OUT (phono jack)**

Loop-through outputs of the AUDIO IN connector.

**EXT SYNC (external sync) IN (BNC)**

When this monitor operates on an external sync signal, connect the signal from a sync generator to this connector.

To use the sync signal fed through this connector, select "RGB-EXT SYNC" or "COMP-EXT SYNC" in the RGB A SYSTEM menu.

**EXT SYNC (external sync) OUT (BNC)**

Loop-through output of the EXT SYNC IN connector.

Connect to the external sync input connector of video equipment to be synchronized with this monitor.

When the cable is connected to this connector, the 75-ohms termination of the input is released, and the signal input to the EXT SYNC IN connector is output from this connector.

**5 Ground (⏏/⊕) terminal**

Connect a GND cable.

**6 RGB/COMPONENT B connectors**

RGB signal or component signal input connectors.

To monitor the input signal fed through these connectors, press the RGB/COMPONENT B select button (light on) on the front panel.

Then select one out of four items in the RGB B SYSTEM menu to set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal.

*For the operation through the menus, see pages 10 to 12.*

**R/R-Y IN, G/Y IN, B/B-Y IN (BNC)**

When "RGB-INT SYNC" or "COMP-INT SYNC" is selected in the RGB B SYSTEM menu, the monitor operates on the sync signal from the G/Y channel.

**To monitor the RGB signal**

Connect to the analog RGB signal output connectors of a video camera.

**To monitor the component signal**

Connect to the R-Y/Y/B-Y component signal output connectors of a Sony Betacam SP camcorder.

**AUDIO IN (phono jack)**

Connect to the audio output connector of video equipment when the analog RGB or component signal is input.

**EXT SYNC (external sync) IN (BNC)**

When this monitor operates on an external sync signal, connect the signal from a sync generator to this connector.

To use the sync signal fed through this connector, select "RGB-EXT SYNC" or "COMP-EXT SYNC" in the RGB B SYSTEM menu.

**7 REMOTE connectors****RS-232C (D-sub 9-pin)**

Connect to the RS-232C control connector of other equipment. You can operate the monitor with the control command from the equipment.

*For the details, see the supplied Interface Manual for Programmers.*

**REMOTE 1 (8-pin mini DIN)**

Connect to the tally output connector of a control console, effects, etc. The tally indicator on the front panel will be turned on and off by the connected equipment.

You can also connect a remote controller using this connector.

*For the pin assignments of these connectors, see "Specifications" on page 4.*

**DC OUT 5V/1A connector**

You can use this connector as a power source for the other equipment.

DC 5V/1A is output.

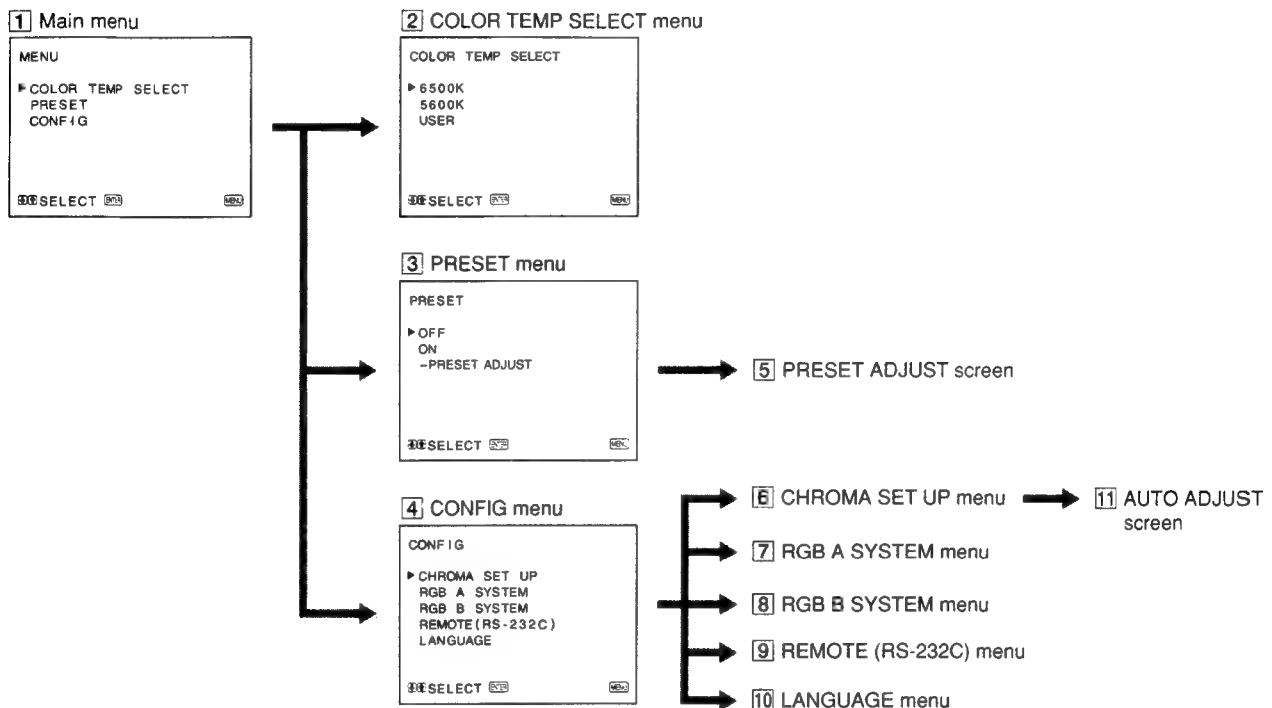

# Using On-Screen Menus

PVM-2053MD

## Menu Configuration

The flow chart shows the different levels of on-screen menus that you can use to make various adjustments and settings.

For details of each menu, see pages 11 and 12.

### User Service Mode

## Operating through Menus

There are five buttons for menu operations on the front panel of the monitor. To display the main menu, first press MENU (EXIT). The buttons you can use appear at the bottom of the menu screen.

### Functions of the buttons

Button	To select menu item	To adjust selected menu item
MENU EXIT	return to the previous menu.	return to the previous menu.
ENTER SELECT	decide a selected item.	select an item.
↑ +	move the cursor (▶) upwards.	increase selected value.
↓ -	move the cursor (▶) downwards.	decrease selected value.
RESET		reset current adjustment value to the factory setting.

(The above items in white type correspond to the marks in the menu.)

## The Contents of Menu Items

The following sentences show the details of each menu items.

[ ] indicates the factory setting position.

### 1 Main menu

Select an item and press the ENTER (SELECT) button to go to the following menu.

### 2 COLOR TEMP SELECT menu

Select the color temperature from among 6500K, 5600K and USER. USER is set to 6500K in the factory setting. You can adjust or change the color temperature in USER mode (a measuring instrument is needed).

[6500K]

#### Note

The color temperature of the USER mode can be adjusted in the range from 3200K to 10000K. You can adjust the color temperature of the USER mode in the USER COLOR TEMP ADJUST menu ([12]) of the user service mode. For the details, see *USER COLOR TEMP ADJUST menu ([12])* on page 12.

### 3 PRESET menu

You can preset each control to a desired level and set it. If you set PRESET to ON, the REMOTE indicator lights up and the controls on the front panel do not work. The monitor operates with the internal memory settings. For adjustment, select the PRESET ADJUST screen.

[OFF]

### 4 CONFIG menu

Select an item for adjustment of the monitor.

### 5 PRESET ADJUST screen

Adjust CONTRAST, BRIGHT, CHROMA, PHASE, VOLUME, APERTURE in the PRESET menu.

### 6 CHROMA SET UP menu

Set to ON to adjust the internal decoder for CHROMA and PHASE (NTSC signal only) after AUTO ADJUST screen ([11]).

[OFF]

### 7 RGB A SYSTEM menu

To monitor the signal fed through the RGB/COMPONENT A connectors, set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal in this menu.

[RGB-INT SYNC]

### 8 RGB B SYSTEM menu

To monitor the signal fed through the RGB/COMPONENT B connectors, set the RGB or COMP (component) signal and the INT SYNC (internal sync) or EXT SYNC (external sync) signal in this menu.

[RGB-INT SYNC]

# Using On-Screen Menus

PVM-2053MD

## 9 REMOTE (RS-232C) menu

Select one out of following three modes.

REMOTE OFF:

You can adjust settings and controls by the buttons and controls on the front panel.

The RS-232C connector does not function.

REMOTE ONLY:

You can adjust settings and controls through the RS-232C connector.

Buttons and controls on the front panel, except the menu operation ones, do not function.

REMOTE & LOCAL:

You can adjust settings and controls both through the RS-232C connector and the front panel buttons.

Controls on the front panel do not function.

[REMOTE OFF]

## 10 LANGUAGE menu

You can select the language used for on-screen menus from the following five languages (English, German, French, Italian, Spanish).

[ENGLISH]

## 11 AUTO ADJUST screen

Select the color bar signal (full, SMPTE, EIA) and press the ENTER (SELECT) button to start automatic adjustment for CHROMA and PHASE. For these adjustments to be valid, you must select ON in CHROMA SET UP menu ([6]).

## User Service Mode

The user service mode is useful when adjusting the settings and controls except for the above.

To enter the user service mode, press and hold the MENU (EXIT) button until the following USER SERVICE 1 appears.

To move to the second page of the mode, select "NEXT PAGE" and to return to the first page, select "PREVIOUS PAGE".

## 12 USER COLOR TEMP ADJUST menu

The value of adjustment in this menu works only when "USER" is selected in the COLOR TEMP SELECT menu ([2]).

ADJUST GAIN:

Adjusts the color balance (gain) of the USER mode.

ADJUST BIAS:

Adjusts the color balance (bias) of the USER mode.

COLOR TEMP RANGE:

When you adjust the color temperature in the USER mode, select a color temperature range before adjusting ADJUST GAIN and ADJUST BIAS. If the adjusted color temperature is between 3200K and 5000K, select "3200K-5000K." If the adjusted color temperature is between 5000K and 10000K, select "5000K-10000K."

[5000K-10000K]

## 13 COLOR SYSTEM DISPLAY menu

Select the color system display mode. In AUTO, the kind of color system being used appears on the screen each time you change the signal input.

[AUTO]

## 14 358 TRAP FILTER menu

Color spill or color noise may be eliminated if you select ON (NTSC signal only). Normally set it to OFF.

[OFF]

## 15 SPLIT PHASE menu

When the SPLIT function is activated, if the lower side picture (the signal fed through the RGB/COMPONENT B input connectors) has some discrepancy of location with the upper side picture, adjust the SPLIT PHASE menu.

Each time you press the ↑(+) button, the lower side picture moves left.

### Note

When the adjustment is made in the menu, the skew error will occur on the top of the lower side picture.

## 16 COMPONENT LEVEL menu

Select the component level from among three modes.

N10/SMPTE: for 100/0/100/0 signal

BETA 7.5: for 100/7.5/75/7.5 signal

BETA 0: for 100/0/75/0 signal [N10/SMPTE]

## 17 NTSC SETUP LEVEL menu

Select the NTSC setup level from two modes. The 7.5 setup level is mainly used in north America. The 0 setup level is mainly used in Japan. [0]

## 18 SUB CONTROL screen

You can finely adjust the controls on the front panel. CONTRAST, PHASE, CHROMA and BRIGHT controls have clicks at the center of their adjustment range. You can adjust the setting of the click position with this feature.

## 19 V HOLD screen

Adjust the vertical hold if the picture rolls vertically.

### Note

If the rolling of the picture prevents you from watching the screen, select an input that has nothing connected.

# Power Sources

PVM-2053MD

## House Current

Connect the supplied AC power cord to the AC IN socket on the rear panel and to a wall outlet.

**To connect an AC power cord securely with the AC plug holder**

**To remove the AC power cord**

Pull out AC plug holder by squeezing the up and down sides.

# Attaching the Splash Proof Covers

PVM-2053MD

In order to protect the ventilation holes from splashes (of medicines, etc.), attach the splash proof covers (supplied) as shown below.

1

Splash proof covers

Making sure the arrows on the cover are facing down, hook the nails on the upper edge into the ventilation holes.

## Note

Attach the splash proof covers to all them ventilation holes.

2

Push up the nails on the bottom edge and fit the cover into the lowest ventilation holes. Attach the both covers to the left and right sides.

# Attaching the Control Panel Cover

In order to protect the control buttons on the front panel from undesired touching, attach the supplied control panel cover.

1

Attach the panel hinges to the left and right grips from the inner side.

2

Fit the bosses on the both sides of the control panel cover into the lower holes of the panel hinges with bending the control panel cover a little.

## SECTION 2 DISASSEMBLY

### 2-1. TOP COVER AND REAR COVER REMOVAL

### 2-2. TERMINAL BOARD REMOVAL

### 2-3. J, H BOARDS REMOVAL

## 2-4. PICTURE TUBE REMOVAL

### • REMOVAL OF ANODE-CAP

NOTE : Short circuit the anode of the picture tube and the anode cap to the metal chassis, CRT shield or carbon paint on the CRT, after removing the anode.

### • REMOVING PROCEDURES

- ① Turn up one side of the rubber cap in the direction indicated by arrow (a).
- ② Using a thumb pull up the rubber cap firmly in the direction indicated by the arrow (b).
- ③ When one side of the rubber cap is separated from the anode button, the anode-cap can be removed by turning up the rubber cap and pulling up it in the direction of the arrow (c).

### • HOW TO HANDLE AN ANODE-CAP

- ① Don't hurt the surface of anode-caps with sharp shaped material!
- ② Don't press the rubber hardly not to hurt inside of anode-caps!  
A material fitting called as shatter-hook terminal is built in the rubber.
- ③ Don't turn the foot of rubber over hardly!  
The shatter-hook terminal will stick out or hurt the rubber.

## SECTION 3 SET-UP ADJUSTMENTS

### 3-1. PREPARATIONS (1)

#### Service Mode

This set is provided with a switch for service on the front panel that can be used to make various adjustments. The operation method of this switch is explained in detail below.

#### 1. ENTERING THE SERVICE MODE

Simultaneously press the [ENTER] key and the [DEGAUSS] key shown on the display of the menu.

#### 2. SERVICE MODE DISPLAY

(1)	(5)	(4)	(3)	(6)
(2)				

Range of Service Mode Display

- (1) The service items are largely classified into 16 types displayed by titles.
- (2) The names of the service items or READ / WRITE guidance, etc., are displayed. The names are displayed to the left and the guidance to the right.
- (3) This is the serial number for each of the service items. 1-120.
- (4) This is the adjustment data for the service items that are now stored in the RAM. Adjustments can be made by changing these values, but as long as nothing is written to the ROM the adjustment values will be erased by turning off the power or by reading, so please be careful.
- (5) When the adjustment data that is now displayed is identical with the data in the ROM, the cursor (▷) is displayed.
- (6) The present status is displayed.
  - [\*] : Writing to the ROM. Make sure not to turn off the power while this display is on.
  - [?] : ROM reading error. In this case, an image is output with the standard adjustment data that the microcomputer itself possesses.
  - [i] : Problem in the I<sup>2</sup>C bus.

#### 3. FINISHING THE SERVICE MODE

Simultaneously press the [ENTER] key and the [DEGAUSS] key shown on the display of the menu.

#### 4. EASY ON / OFF OF THE SERVICE MODE

If once entering the service mode after having turned on the power, easy ON / OFF is possible by once more pressing the A, B or C switch on the front panel (the LED lights) as long as the power is not turned off or as long as the service mode is not finished.

#### 5. CHANGE OF POSITION OF THE SERVICE MODE DISPLAY

If the switch is continuously pressed when turning on in the above easy mode, the display position moves in the V direction. This method is used when the display is outside of the effective screen area.

#### 6. CHANGE OF SERVICE ITEMS

The items are returned with the [MENU] key and forwarded with the [ENTER] key. When a key is continuously pressed, the operation will be repeated.

#### 7. CHANGE OF SERVICE DATA

The service data is made larger with the [↑] key and smaller with the [↓] key. When continuously pressing the keys, the operation will be repeated.

#### 8. READING OF SERVICE DATA

When reading data from the ROM to the RAM, press the RESET key once and check that the READ display is shown in the guidance, and then press the RESET key once again. The adjustment data that is written will return to its previous state, so please be careful.

#### 9. WRITING OF SERVICE DATA

When writing data from the RAM to the ROM, press the [DEGAUSS] key once and check that the WRITE display is shown in the guidance, and then press the [DEGAUSS] key once again. Not only the displayed data will be written, but all data, so please be careful.

#### 10. CARRYING OUT FACTORY RESETTING

In case the adjustment data has been destroyed for some reason, and you keep pressing the RESET key at the beginning of the above reading, the READ guidance will change to FACTORY RESET guidance in approximately 3 seconds so that the factory resetting can be carried out. By once again pressing the RESET key after this, resetting will be carried out ([\*] will be displayed as status) and factory resetting will be executed. However, in case the data available at the time of shipment from the factory has been destroyed, or if the ROM has been replaced, etc., or if factory setting mentioned later on has been carried out, factory resetting is executed.

#### 11. CARRYING OUT FACTORY SETTING

Make sure to make possible the above factory resetting by making a copy of the adjustment data when replacing the ROM. If you keep pressing the [DEGAUSS] key at the beginning of the above writing, the WRITE guidance will change into FACTORY RESET guidance after approximately 3 seconds. By once again pressing the [DEGAUSS] key after this, setting will be carried out ([\*] will be displayed as status) and the data will be copied. By carrying out this operation, the selection items of the menu and the adjustment values will be reset to the standard conditions, so please be careful. If this operation is carried out once, it cannot be carried out again, but the FACTORY SET FLAG in the service mode can be set to 1.

# ROM INITIAL WRITING VALUE OF SERVICE DATA

## SERVICE MAP Ver 1.0MD (1 - 98)

No.	SERVICE ITEM		STD	No.	SERVICE ITEM		STD
1	NOR 50 DEF	H FREQUENCY	144	61	USER C/T ORG	BIAS <RED>	650

## PREPARATIONS (2)

\* When composite video or component signals are supplied, they must be supplied as below.

Signal		Signal Contents	Standard Level P-W
COMPOSITE VIDEO	358NT	100% WHITE	0.714V
		75% WHITE	0.536V
	PAL	100% WHITE	0.7V
		75% WHITE	0.525V
COMPONENT	BETA 0	100% WHITE Y	0.7V
		75% WHITE Y	0.525V
		75% COLOR B-Y, R-Y (This item only p-p)	0.7V
	SMPTE	100% WHITE Y	0.7V
		75% WHITE Y	0.525V
		75% COLOR B-Y, R-Y (This item only p-p)	0.525V
AUDIO		-0.5dBs	0.436Vrms

\* In this document, terms inside boxes   are names of service mode adjustments.

Example 60H-FREQ

\* After making adjustments in service mode, write the adjustment data before cutting off the power. If you cut off the power without writing, the results of your adjustments are all lost.

\* Standard inspection conditions

Unless specifically specified otherwise in this document, the following conditions are used for adjustments and inspections.

APERTURE	MIN
BRIGHT	50% (Center click)
CHROMA	50% (Center click)
PHASE	50% (Center click)
CONTRAST	80% (Center click)
VOLUME	50%

## 3-2. WRITING MODEL DATA

1. In service mode, write in the following model data at MODEL.

PVM-1353MD/1953MD ..... 5

PVM-1453MD/2053MD ..... 1

2. In service mode, write in the following data at COLOR TEMP DISP 1.

PVM-1353MD/1453MD ..... 65

PVM-1953MD/2053MD ..... 65

3. In service mode, write in the following data at COLOR TEMP DISP 2.

PVM-1353MD/1453MD ..... 56

PVM-1953MD/2053MD ..... 56

## 3-3. PICTURE OUTPUT

1. Set the AC input voltage.

(1) Input the video and audio signals to the corresponding terminals on the connector panel.

(2) Set the sliduck AC voltage as shown on the right.

Model	Voltage
PVM-1353MD/1953MD	AC120 ± 3V (Distortion rate : 3% or less)
PVM-1453MD/2053MD	AC220 ± 3V (Distortion rate : 3% or less)

## 3-4. LANDING ADJUSTMENT

1. Preparations

1) To reduce the influence of geomagnetism, face the set's CRT screen east or west.

2) Loosen the deflection yoke fixture and lower the deflection yoke to the rear.

3) Switch on the Power switch and degauss with the degausser.

4) Adjust the deflection yoke tilt.

2. Adjustment

1) CONT ..... MIN

BRT..... Position providing good vision

2) The rough adjustments of the white balance, G2, and convergence must be completed already.

3) Set green-only.

4) Adjust the purity knob so that the green comes to the center of the screen. Make the red and blue about even. Fig. 1

5) Switch to blue only, red only, and green only and verify each. Fig. 1, 2, and 3

6) Bring the deflection yoke gradually forward and adjust the deflection yoke so that the R and B at both sides of the screen become green. Fig. 2 → 3

7) If the deflection yoke comes too far forward, you will see the pattern shown in Figure 4. If that happens, lower the deflection yoke to the rear. Fig. 4 → 3

8) Switch the single color switch to B and verify the single color. Fig. 6

9) Switch the single color switch to R and verify the single color. Fig. 9

10) When one of the colors does not become the single color correctly, check by repeating Items 7 and 8 based on the single color not coming into adjustment.

If you can not obtain landing in the corners, paste on magnets.

11) Switch to an all-white signal and check the uniformity.

12) When the deflection yoke position is determined, fasten it with the fixture.

### 3-5. CONVERGENCE ADJUSTMENT

1. Input a dot pattern signal.  
CONT ..... Position providing good vision  
BRT..... MIN
2. Align the horizontal R, G, and B dots at the center of the screen with the H-STAT VR. (\*1)  
\*1 : If the H-CENTER adjustment was after the H-STAT adjustment, re-adjust the H-STAT.  
(The H-CENT VR changes the H-STAT too.)
3. Align the R, G, and B at the center of the screen with the V-STAT magnets. (\*2)  
\*2 : After the V-STAT adjustment, paint on the knobs to lock them.

V-STAT magnet knobs  
While keeping the angles for A and B equal ( $I=I'$ ), align the vertical convergence.

If the A and B knobs are not symmetrical ( $I \neq I'$ ), this has bad effects. The focus may deteriorate and beam striking may occur.

4. For HMC, use the 6-pole magnet to adjust the R and B dots to be symmetrical left and right about the G dot. (\*1)

\*1 :

The HMC adjustment changes the opening of the 6-pole magnet.

Adjust the 6-pole magnet so that  $A=A'$ . You must maintain the relationship  $I \neq I'$  while moving the magnet.

5. For VMC, use the 6-pole magnet to adjust the R and B dots to be symmetrical above and below the G dot. (\*2)

\*2:

6. Adjust by repeating the adjustments in Items 2 through 5. (\*3)

\*3: The above adjustment may affect the landing, so after this adjustment, check the landing again.

7. After the adjustment is complete, paint on the knobs to lock them.

### 3-6. DEFLECTION YOKE NECK ROTATION ADJUSTMENT

If there is misconvergence at both sides on the X or Y axis of the screen, turn the neck of the deflection yoke in the direction of the arrow to reduce the misconvergence for the entire CRT screen to within the tolerance.

1. Reverse misconvergence pattern

Turn the deflection yoke neck down.

Positive misconvergence pattern  
Turn the deflection yoke neck up.

Pattern when deflection yoke too far to the left

As viewed from the CRT screen, turn the deflection yoke neck to the right.

Pattern when deflection yoke too far to the right

2. Insert the three wedges in the deflection yoke and CRT funnel surface to fasten the deflection yoke.

14" Wedge positions

20" Wedge positions

3. The pattern below can not be corrected by turning the neck.

\* Gun rotation  
The beam is twisted at both sides on the X axis and Y axis.

\* HCR large (small)  
At both sides of the screen, the G raster horizontal component is wider (narrower) than those of the R and B rasters.

\* VCR large (small)  
At both sides of the screen, the G raster vertical component is wider (narrower) than those of the R and B rasters.

### 3-7. G2 ADJUSTMENT

1. Input a 525 monoscope signal.
2. Connect the oscilloscope to A board TP403.
3. Of the three reference pulses, measure the lowest one.
4. With the Screen VR, adjust so that left end of the waveform is :  $1.40 \pm 0.1V$

### 3-8. WHITE BALANCE ADJUSTMENT

For measuring equipment, use a color analyzer. (for example from Minolta, etc.)

1. Input a 525 monoscope signal.  
(Input from Line A with no burst.)
2. Set :  
CONT ..... 0%  
BRT..... 50%
3. On a 20-tone gray scale, adjust service mode **SUB BRIGHT** so that  
0 and 5 IRE → cut off  
10 IRE → slight glow
4. Input 525 all-white (no burst).
5. Set CONT to 80%.
6. Adjust the all-white signal luminance so that the screen luminance is 3 NIT.
7. Press MENU and select COL TEMP/SEL.
8. Select T1 : 6500K.
9. Put the unit into service mode. (\*1)  
\*1 : Set **3200 K SW** to 0 for both T1 and T2.
10. Adjust to the standard values with **C/T1 XX00K BIAS**.  
(G must be fixed at "512".) (\*2)  
\*2 : Adjust the cut-off to be 3 NIT.  
Spec. 6500K + 8M PCD
11. Switch the all-white signal luminance to 100 IRE
12. Adjust to the Standard values with <RED> and <BLUE> of **C/T1 GAIN XX00 K**.  
(G must be fixed at "700")
13. Repeat Items 10, 11 and 12 until the adjustment is complete, then write the adjustment data.
14. Press MENU and select COL TEMP/BAL.
15. Select T2 : 5600K.
16. In the same manner as in Items 10, 11, 12 and 13 make the **C/T2 5600K BIAS** and **C/T2 5600K GAIN** adjustments.  
Spec. 5600K + 8M PCD

### 3-9. SUB BRT ADJUSTMENT

1. Input a 525 monoscope signal.
2. CONT ..... MIN  
BRT ..... CENTER (50%)
3. Put the unit into service mode and select **SUB BRIGHT**
4. Adjust **SUB BRIGHT** so that 10 IRE gives a slight glow and 10 IRE gives cut off.

### 3-10. FOCUS ADJUSTMENT

**Note :** PVM-1353MD/1453MD are adjusted with RV707 on the C board.

PVM-1953MD/2053MD are adjusted with the RV at the top of the FBT main unit.

1. Input a 525 monoscope signal. (PVM-1353MD/1953MD ONLY)  
Input a 625 monoscope signal. (PVM-1453MD/2053MD ONLY)
2. Adjust the focus to optimize the focus on the characters "30" at the center of the screen.
3. Switch to an all-white signal and check the uniformity.

## SECTION 4

### SAFETY RELATED ADJUSTMENT

The following adjustments should always be performed when replacing the following components (marked with  $\boxtimes$ ,  $\boxdot$  on the schematic diagram).

+B detection .....  $\boxtimes$  R1535

Tertiary coil detection .....  $\boxtimes$  R1536

Part replaced ( $\boxdot$ )

Hold Down Circuit .....  $\boxdot$  A board IC500, IC507, D501,  
D533, C506, C512, C523,  
C549, C592, R506, R518,  
R519, R551, R1536,  
R1537, R1560, T501

Beam Current Protector

Circuit .....  $\boxdot$  A board Q500, Q511, C513, R508,  
R515, R516, R517

B+ Regulator Circuit .....  $\boxdot$  A board R1535  
 $\boxdot$  G board IC602, C603

#### **B+ VOLTAGE CONFIRMATION**

Standard : less than 117.0VDC

Check Condition : Input voltage :  $110 \pm 2$  VAC

Note : Use NF Power Supply or make sure that distortion factor is 3% or less.

Input signal : Monoscope signal

Controls : BRT & CONT  $\Rightarrow$  Initial reset

#### **HOLD-DOWN CIRCUIT VOLTAGE CONFIRMATION**

(1) Hold down circuit (B+ Actuation)

- a) When  $IABL = 1000 \pm 50 \mu A$ , raster goes out at less than  $130.5 \pm_{10}^{50} V$  by applying an external DC voltage to IC500 ② pin (TP502).

Input signal : ALL white

- b) When  $IABL = 120 \pm 20 \mu A$ , raster goes out at less than  $133.5 \pm_{10}^{50} V$  by applying an external DC voltage to IC500 ② pin (TP502).

Input signal : Dot

(2) Hold down circuit (Tertiary coil detection voltage)

Confirmatory item : 110.0V voltage should be applied to the ① pin of IC500.

- a) When  $IABL = 1000 \pm 50 \mu A$ , raster goes out when applying less than DC 148.0V voltage to the ① pin (TP503) of IC500 from outside.

Input signal : ALL white

- b) When  $IABL = 120 \pm 20 \mu A$ , raster goes out when applying less than DC 148.5V voltage to the ① pin (TP503) of IC500 from outside.

Input signal : Dot

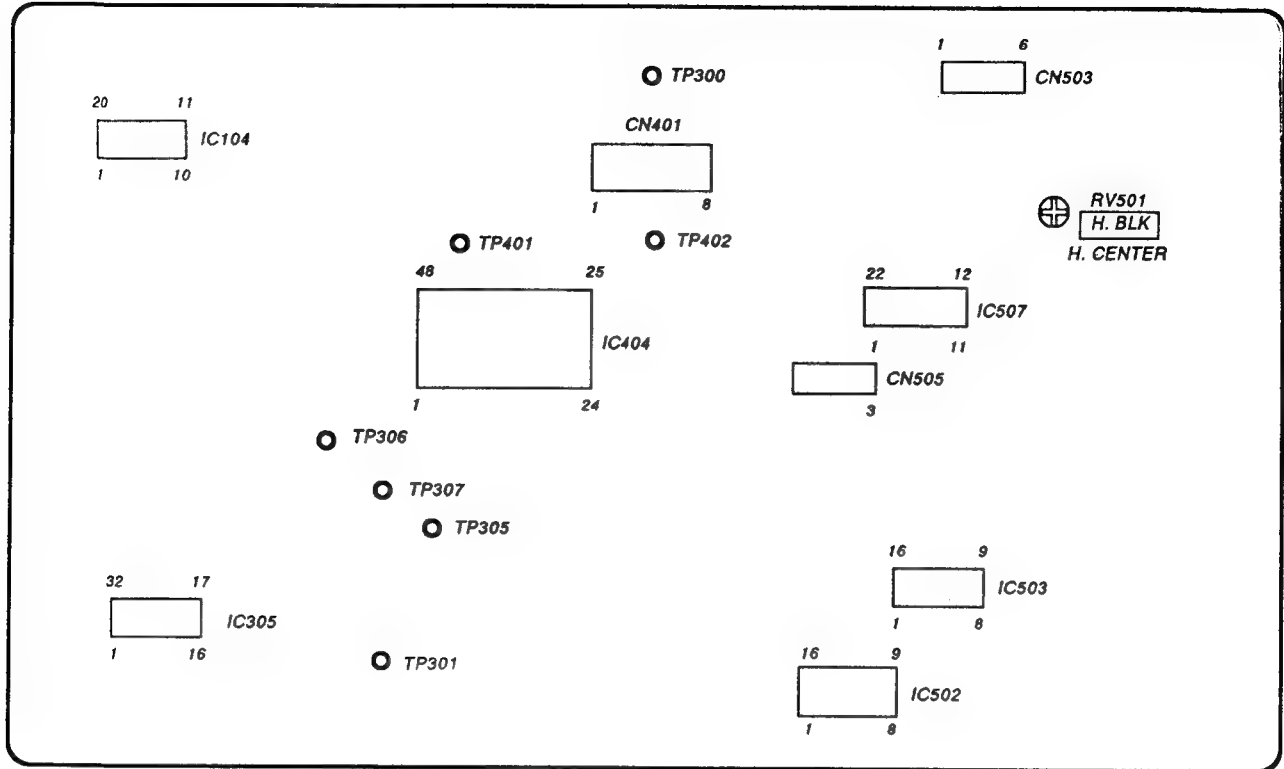

## SECTION 5 CIRCUIT ADJUSTMENTS

### 5-1. A BOARD ADJUSTMENT

A BOARD — COMPONENT SIDE —

A BOARD — CONDUCTOR SIDE —

## I. Preparations

\* When composite video or component signals are supplied from connector CN301, they must be supplied taking into account the effect of the Q board as indicated on the right.

The levels of the signals supplied must be within  $\pm 2\%$  of the standard on the right.

Signal		Signal Contents	Standard Level (Pedestal-White)	Reduction Ratio	Connector Feed Level (Pedestal-White)
COMPOSITE VIDEO (75% COLOR BAR)	358NT	100% WHITE	0.714V	93%	0.664V
		75% WHITE	0.536V	93%	0.498V
		BURST (GREEN) (This item only P-P)	286mV (632mV)	94% (94%)	269mV (594mV)
	PAL	100% WHITE	0.7V	94%	0.651V
		75% WHITE	0.525V	94%	0.488V
		PAL BURST (GREEN) (This item only P-P)	300mV (664mV)	94% (94%)	282mV (624mV)
COMPONENT (75% COLOR BAR)	BETA0	100% WHITE Y	0.7V	94.8%	0.664V
		75% WHITE Y	0.525V	94.8%	0.498V
		75% COLOR B-Y, R-Y (This item only P-P)	0.7V	94.8%	0.664V
	SMPTE	100% WHITE Y	0.7V	94.8%	0.664V
		75% WHITE Y	0.525V	94.8%	0.498V
		75% COLOR B-Y, R-Y (This item only P-P)	0.525V	94.8%	0.498V

\* In this document, terms inside boxes   are names of service mode adjustments.

Example 60H-FREQ

\* CONT 80% is the center click position for the user control.

## II. Deflection System Adjustment

### 1. ADJUSTING THE HORIZONTAL OSCILLATION FREQUENCY

1. Input a 525 monoscope signal.
2. Set :  
CONT ..... 80%  
BRT ..... 50%
3. Put the unit into service mode.
4. Drop A board IC507 Pin 1 to ground with a  $100\mu/16V$  electrolytic capacitor. (Ground must use CN505 Pin 3.)  
Or plug the H-FREQ tool into CN505.
5. Adjust 60H-FREQ so that the diagonal lines on the screen become vertical lines. (Fig. 1)
6. Input a 625 monoscope signal.
7. Adjust 50H-FREQ so that the diagonal lines on the screen become vertical lines. (Fig. 1)

Fig. 1

## 2. H-BLK Adjustment

1. Input a 525 monoscope signal.
2. Set :  
CONT..... 80%  
BRT..... 50%
3. Put the unit into service mode.
4. Observe the anode of D516 or TP300 with the oscilloscope and adjust [H-BLK] to obtain the waveform in Fig. 2.

Fig. 2

## 3. PICTURE PHASE Adjustment

1. Input a 525 monoscope signal.
2. Put the unit into under scan mode.
3. Set :  
CONT..... Min.  
BRT..... Max.
4. Put the unit into service mode.
5. Use [U/S H SIZE] to adjust the size of the monoscope white frame to be about 1 cm to the inside of the limits of the effective screen.
6. Turn RV501 (H-CENT) and adjust so that B=B'.
7. Adjust [60 VIDEO PHASE] so that the signal region comes to the center (A=A') of the deflection region. (Fig. 3)

Fig. 3

8. Input a 625 monoscope signal.
9. Adjust [50 VIDEO PHASE] in the same manner.

## 4. V-BLK Adjustment

1. Input a 525 monoscope signal.
2. Put the unit into under scan mode.
3. Set :  
CONT..... Min.  
BRT..... Max.
4. Put the unit into service mode.
5. Adjust [V BLK (60)] so that before 0.5H of the white frame on the top of the monoscope is barely unblocked.
6. End under scan mode and put the unit into Normal 16:9 mode.
7. Input a 625 monoscope signal.
8. Adjust [V BLK (50)] in the same manner as in 5 above.

## 5. VERTICAL DEFLECTION SECTION Adjustment

Normal V. Size Standards

	525	625
4 : 3	11.75 ± 0.2 frames	11.2 ± 0.2 frames

1. Input a 525 monoscope signal.
2. Set :  
CONT..... 80%  
BRT..... 50%
3. Put the unit into service mode.
4. Roughly adjust 4 : 3 NOR [V-SIZE 60] so that the size becomes to 12 frames.  
Adjust the vertical linearity with [V-LIN].  
Adjust the vertical centering with [V-CENT 60]. (Refer to Note 1.)  
Adjust 4 : 3 NOR [V-SIZE 60] so that the size becomes to the standard value.
5. Input a 625 monoscope signal.
6. Roughly adjust 4 : 3 NOR [V-SIZE 50] so that the size becomes to 11 frames.  
Adjust the vertical centering with [V-CENT 50]. (Refer to Note 1.)  
Adjust 4 : 3 NOR [V-SIZE 50] so that the size becomes to the standard value.

### Note 1:

Reconfirmation is necessary for V. CENT adjustment after V. LIN adjusted.

## 6. HORIZONTAL DEFLECTION SECTION Adjustment (NORMAL SCAN Adjustment)

1. Input a 525 monoscope signal.
2. Set :  
CONT..... 80%  
BRT.....50%
3. Put the unit into service mode.
4. Roughly adjust **NOR H SIZE** so that the size is 15.75 frames.
5. Adjust the horizontal deflection section with **NOR PIN AMP**  
**NOR PIN PHASE** **NOR U/L PIN** **SEXY** **V BOW**  
**V ANGL** **NOR H SIZE** **LOW PIN AMP** **LOW V BOW**.  
(While adjusting the parallelogram distortion and bow distortion with V. ANGL and BOW, adjust the horizontal and vertical lines of the screen becomes straight lines.)
6. Input a 625 monoscope signal.
7. Confirm that the screen is normal.

### Normal H.Size Standards

	525	625
4 : 3	15.75 ± 0.2 frames	15.0 ± 0.2 frames

#### V-ANGL

#### BOW

#### PIN-AMP

#### PIN-PHASE

#### U/L-PIN

#### SEXY

Fig. 4

## 7. HORIZONTAL DEFLECTION SECTION Adjustment (UNDER SCAN Adjustment)

### Standard value

		525	625
14"	U/S H-SIZE	252 ± 2mm	←
	U/S V-SIZE	188 ± 2mm	
20"	U/S H-SIZE	364 ± 3mm	←
	U/S V-SIZE	272 ± 3mm	

1. Input a 525 monoscope signal.
2. Set :  
CONT .....80%  
BRT .....50%
3. Set to U/S mode.
4. Set to service mode.
5. Adjust **U/S V. SIZE <60>** so that UNDER V. SIZE becomes within the standard.
6. Adjust **U/S. H. SIZE** so that UNDER H. SIZE becomes within the standard.
7. Adjust **U/S PIN AMP** and **U/S PIN PHASE**.  
(Steps 5., 6. and 7. explains tracking adjustment.)
8. It's not favorable when the square white line is bulging out of the effective screen after adjusted.
9. Input a 625 monoscope signal.
10. Adjust **U/S V. SIZE <50>** becomes within the standard value.

## 8. OVER SCAN Adjustment

1. Input a 525 monoscope signal.
2. Set :  
CONT .....80% (center click)  
BRT .....50%
3. Set to O/S mode.
4. Set to service mode.
5. Adjust **O/S H. SIZE** and **O/S V. SIZE <60>** so that H. SIZE becomes 13.6 frames and V. SIZE becomes 10.2 frames.
6. Adjust horizontal deflection section with **O/S PIN AMP**, **O/S PIN PHASE**, **O/S U/L PIN**, **O/S LOW PIN AMP**, **O/S LOW V. BOW**.
7. Input a 625 monoscope signal.
8. Adjust **O/S V SIZE <50>** becomes within the standard value.

Standard value

	525	625
O/S H. SIZE	13.6 $\pm 0.8$ frames	13.0 $\pm 0.8$ frames
O/S V. SIZE	10.2 $\pm 0.8$ frames	9.8 $\pm 0.8$ frames

## 9. OSD POSITION Adjustment

1. Input a 525 color bar signal.
2. Connect the oscilloscope probes to TP300 (H-BLK) and IC104 Pin 14.
3. Adjust **OSD POSITION** so that the gap between the rising edge of the H-BLK waveform and the right edge character (the right edge of the " " for service mode **OSD POSITION**) is :  $57 \mu S \pm 0.2 \mu S$

Fig. 6

## 10. WRITING THE ADJUSTMENT

1. Write the adjustment results into memory.  
**Note :** If you cut off the power before writing, the results of your adjustments are all lost.

O/S PIN . AMP

O/S PIN, PHASE

O/S U/L. PIN

O/S LOW PIN . AMP

O/S LOW BOW

Fig. 5

### III. SIGNAL SYSTEM ADJUSTMENT

#### 1. SUB CON ADJUSTMENT

\*This adjustment ought to have completed before HUE adjustment of NTSC 358/443 and PAL.

1. Input a vertical white line signal.  
**Note :** Use a vertical white line signal (525 no burst, H width  $3\mu\text{S}$ , 100IRE).
2. Set :  
CONT..... 80%  
BRT..... 50%
3. Connect the oscilloscope probe to A board CN401 Pin 3.
4. Put the unit into service mode.
5. Adjust SUB BRT.
6. Adjust the pedestal or the distance between the sync tip and white with **SUB CON (4 : 3 NOR)**.

SUB CON (4 : 3 NOR) (Fig. 7).

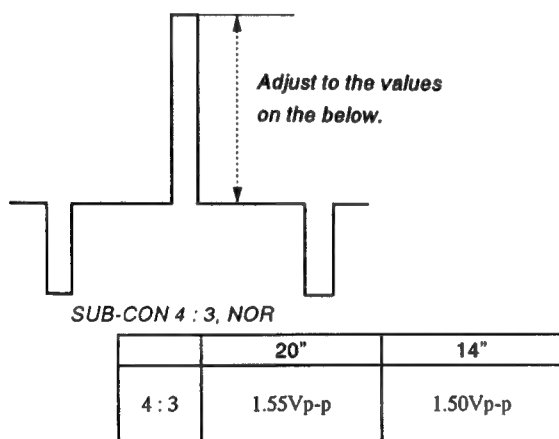

Fig. 7

#### 2. SUB PHASE Adjustment

1. Input a component color bar (R-Y) and EXT SYNC (Beta 0 level signal).
2. Put the unit into Ext Sync mode.
3. Connect the oscilloscope probe to IC404 Pin 30 or TP402.
4. Put the unit into service mode.
5. Adjust **SUB PHASE** to minimize the output waveform (15 mVp-p max.) (Fig. 8)

Fig. 8

#### 3. SUB CHROMA Adjustment

1. Input a component color bar (R-Y, Y, B-Y). (Beta 0 level signal).
2. From the menu, make the Component Level Beta 0.
3. Connect the oscilloscope probe to IC404 Pin 30 or TP402.
4. Put the unit into service mode.
5. Using **SUB CHROMA NORMAL**, adjust so that the tops of the waveform line up as in the diagram below. (Fig. 9)

Fig. 9

#### 4. R-Y LEVEL ADJUSTMENT

1. Input a component color bar (R-Y, Y, B-Y). (Beta 0 level signal).
2. From the menu, make the Component Level Beta 0.
3. Connect the oscilloscope probe to IC404 Pin 41 or TP401.
4. Put the unit into service mode.
5. Using **R-Y LEVEL COMPONENT**, adjust so that the tops of the waveform line up as in the diagram below. (Fig. 10)

Fig. 10

Adjust so that B=D above (20 mV max.) Check that the difference between D and C is no greater than 30 mV

## 5. SMPTE SUB COLOR Adjustment

1. Input a component color bar (R-Y, Y, B-Y). (SMPTE level signal).
2. From the menu, make the Component Level N10/SMPTE.
3. Connect the oscilloscope probe to IC404 Pin 30 or TP402.
4. Put the unit into service mode.
5. In the same manner as in 4-5, adjust **SUB CHROMA N10/SMPTE**.

## 6. BURST GATE PULSE WIDTH Adjustment

1. Input an NTSC color bar.
2. Connect the oscilloscope probes to TP301 (COMP-SYNC) and Q363 or IC305 Pin 1. (Be careful! IC305 Pin 1 is a high-impedance line.)
3. Put the unit into service mode.
4. Adjust **BGP WIDTH** so that the output waveform has the relationship shown in Fig. 11.

Fig. 11

## 7. VXO Adjustment

1. X'tal 358
  - 1) Input an NTSC color bar.
  - 2) Connect the frequency counter to IC305 Pin 21.
  - 3) Put the unit into service mode.
  - 4) Connect the circuit on the below to IC305 Pin 1.
  - 5) Adjust **CRYSTAL 358** so that the counter reading meets the standard below. (You can also just adjust for where the color flicker stops.)

X'tal 358

Standard level  $3579545 \pm 20\text{Hz}$

(For connecting to Pin 1, have the four diodes as close to Pin 1 as possible to reduce the length of the wires.)

2. X'tal 443
  - 1) Input a 443 NTSC color bar.
  - 2) Connect the frequency counter to IC305 Pin 21.
  - 3) Put the unit into service mode.
  - 4) Connect to IC305 Pin 1 in the same manner as in 1-4).
  - 5) Adjust Crystal 443 in the same manner as in 1-5).

X'tal 443

Standard level  $4433619 \pm 20\text{Hz}$

## 8. NTSC COLOR DEMODULATION Adjustment

1. NTSC PHASE
  - 1) Input NTSC color bar signal.
  - 2) Connect the oscilloscope probe to TP306.
  - 3) Set to service mode.
  - 4) Adjust **NTSC PHASE** so that the output waveform burst section becomes a straight line. (Fig. 12)

Fig. 12

## 2. NT358 B-Y PHASE

The phase adjustment must be carried out before the chroma adjustment.

- 1) Input an NTSC color bar. (Input only the R-Y component. Have B-Y and Y off.)
- 2) Connect the oscilloscope probe to TP305.
- 3) Put the unit into service mode.
- 4) Adjust **B-Y PHASE NTSC 358** so that the color components form a straight line.

## 3. NT358 CHROMA (NORMAL)

- 1) Input an NTSC color bar.
- 2) Connect the oscilloscope probe to IC404 Pin 30 or TP402.
- 3) Put the unit into service mode.
- 4) Using **NTSC CHROMA NORMAL**, adjust so that the tops of the waveform line up as in the diagram below. (Fig. 13)

Fig. 13

Adjust so that the levels of the first peak and the fourth peak are the same.

#### 4. NTSC 358 R-Y LEVEL

- 1) Input an NTSC358 color bar.
- 2) Connect the oscilloscope probe to IC404 Pin 41 or TP401.
- 3) Put the unit into service mode.
- 4) Using [R-Y LEVEL NTSC 358], adjust so that the tops of the waveform line up as in the diagram below. (Fig. 14)

IC404 41 pin

Fig. 14

Adjust so that B=D above (20 mV max.) Check that the difference between B and C is no greater than 60 mV.

#### 5. PAL LINE CRAWLING

**Note :** Perform before PAL PHASE ADJUSTMENT.

- 1) Input a PAL color bar.
- 2) Connect the oscilloscope probe to TP402 (B-OUT)
- 3) Adjust the coil of CP302 so that the shaking of MAZENTA wave form become minimum.  
Do not touch the RV at this time.

#### 6. PAL PHASE (NORMAL)

- 1) Input a PAL SP color bar.
- 2) Connect the oscilloscope probe to TP306.
- 3) Put the unit into service mode.
- 4) Adjust [PHASE PAL NOR] so that the B-Y anti-PAL signal waveform is 0. (Fig. 15)

\* Varies every H, although slightly, so adjust so that the average is 0.

Fig. 15

#### 7. PAL B-Y PHASE

- 1) Input a PAL SP color bar.
- 2) Connect the oscilloscope probe to TP305.
- 3) Put the unit into service mode.
- 4) Adjust [B-Y PHASE PAL] so that the B-Y anti-PAL signal waveform is 0. (Fig. 16)

\* Varies every H, although slightly, so adjust so that the average is 0.

Fig. 16

## 8. PAL CHROMA (NORMAL)

- 1) Input a PAL color bar.
- 2) Connect the oscilloscope probe to IC404 Pin 30 or TP402.
- 3) Put the unit into service mode.
- 4) Adjust **CHROMA PAL NOR** so that the tops of the waveform line up. (Fig. 17)

Adjust so that the B and D peaks are the same.

Fig. 17

## 9. PAL R-Y LEVEL

- 1) Input a PAL color bar.
- 2) Connect the oscilloscope probe to IC404 Pin 41 or TP401.
- 3) Put the unit into service mode.
- 4) Adjust **R-Y LEVEL PAL** so that the tops of the waveform line up as in the diagram below. (Fig. 18)

IC404 41 pin

Adjust so that B=D above

Fig. 18

## 9. Writing the adjustment result

1. Write the adjustment results into memory.

## 5-2. G BOARD ADJUSTMENT

### 1. Checking the output lines

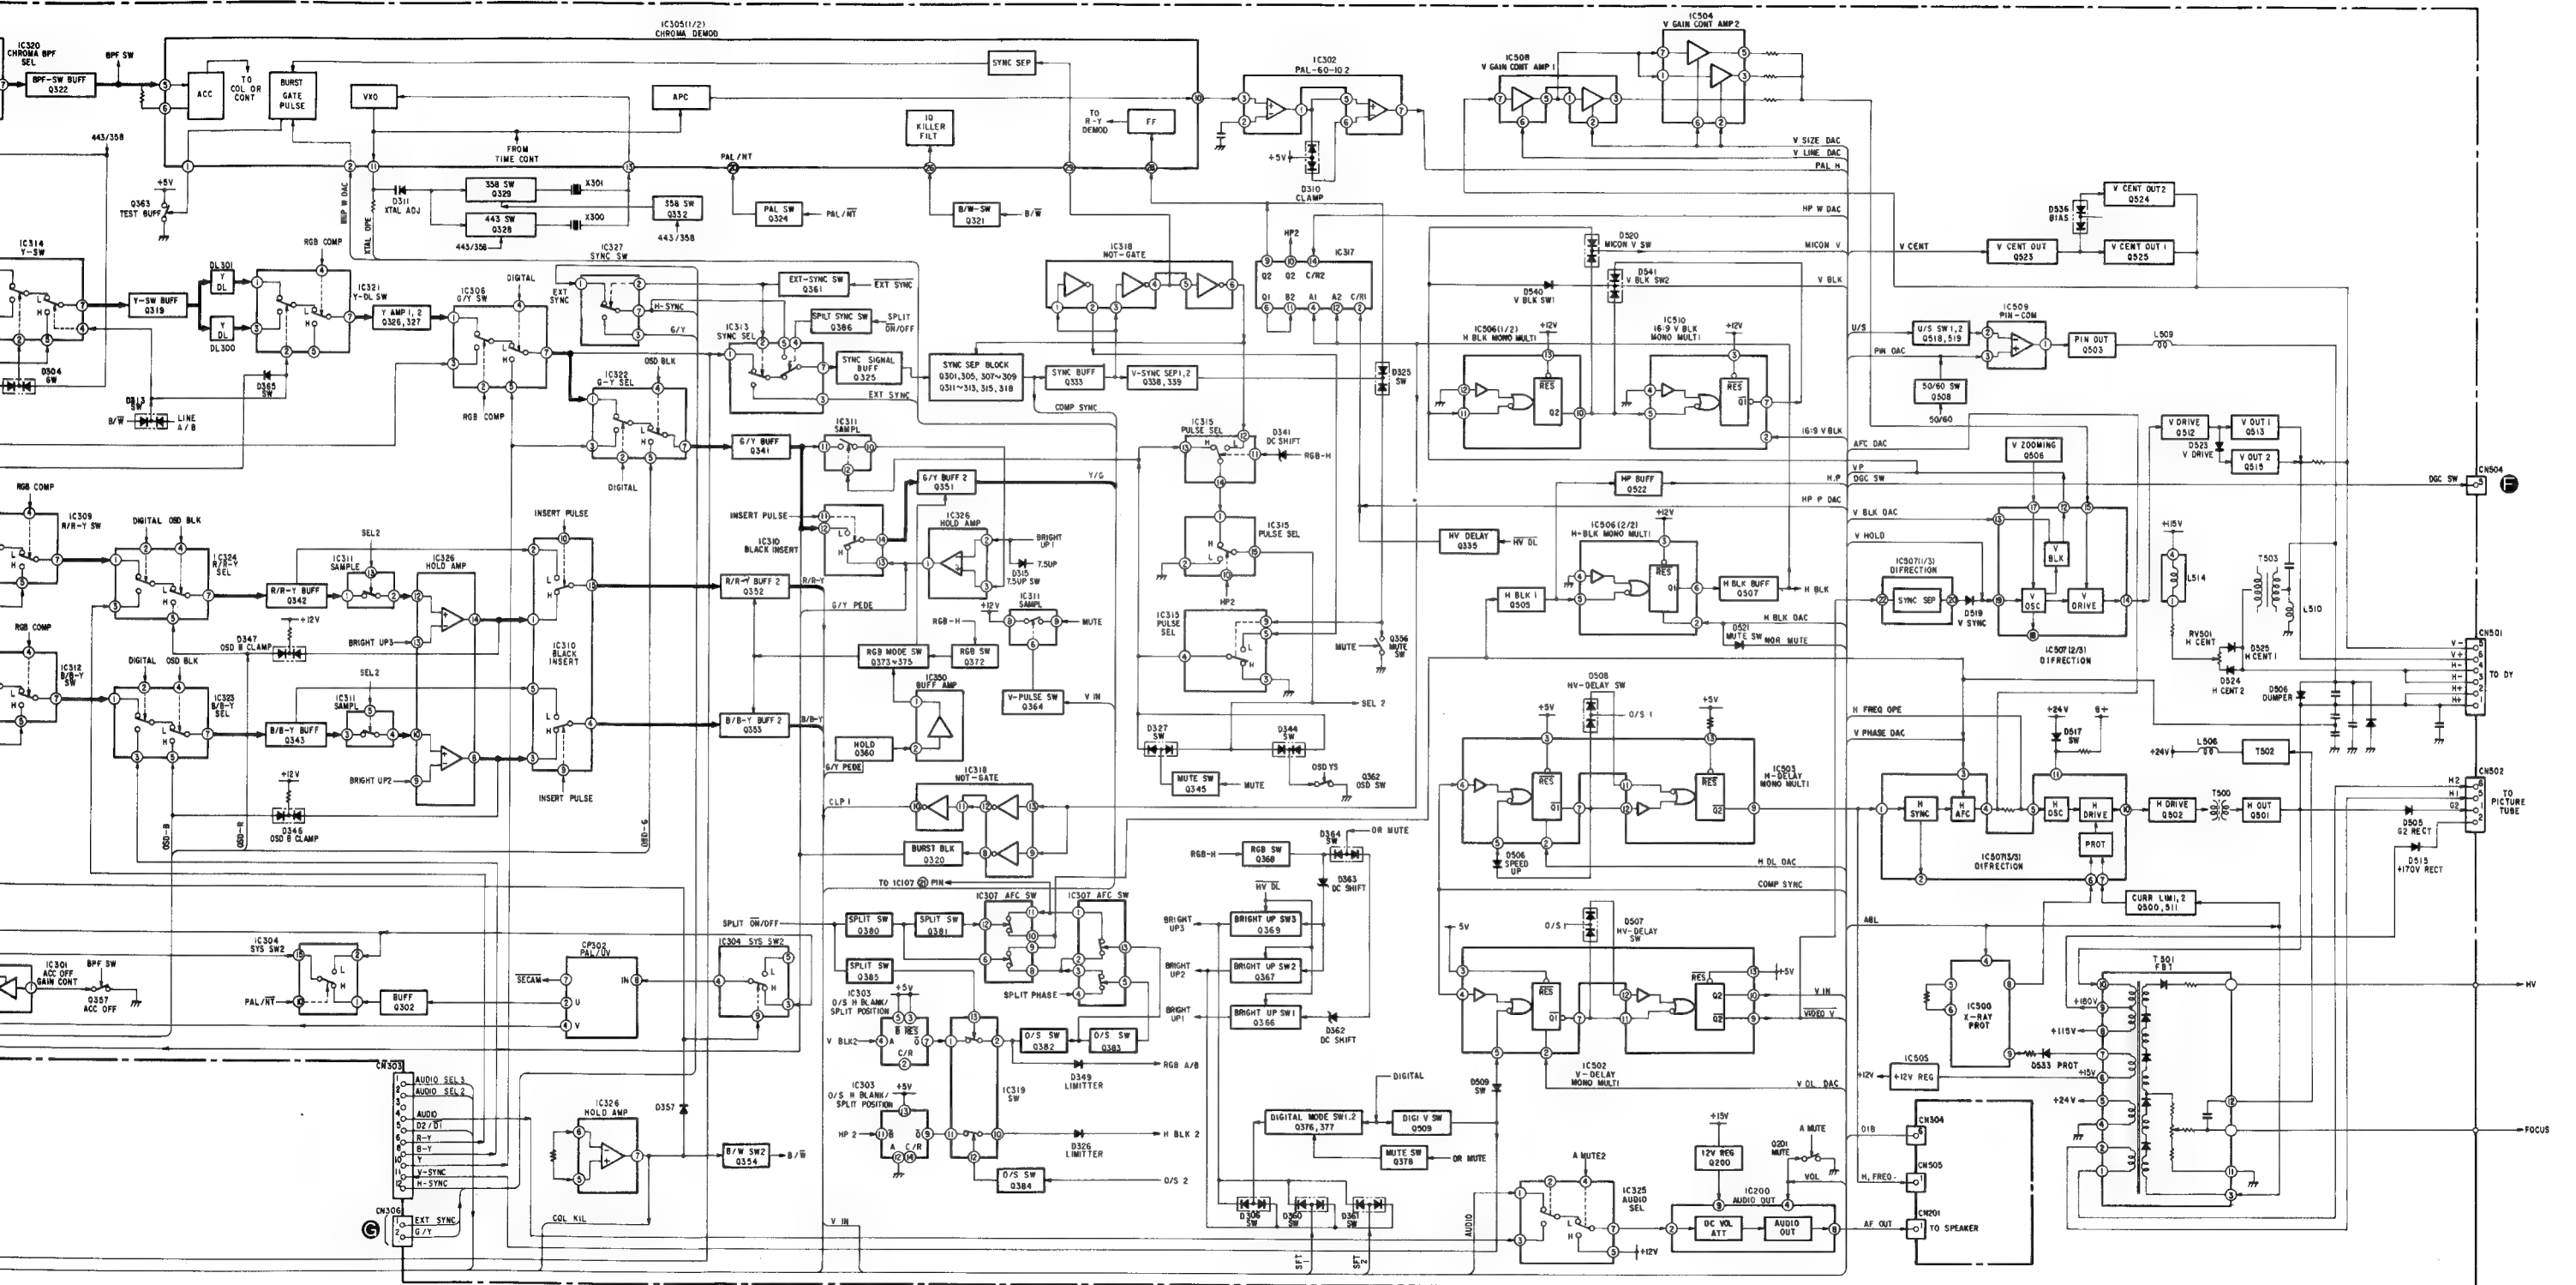

Check that the output lines meet the standards below.

15V	$16.0 \pm 1.0V$
5V(A)	$5.0 \pm 0.3V$
+B	$115 \pm 0.1V$
5V	$5.0 \pm 0.5V$

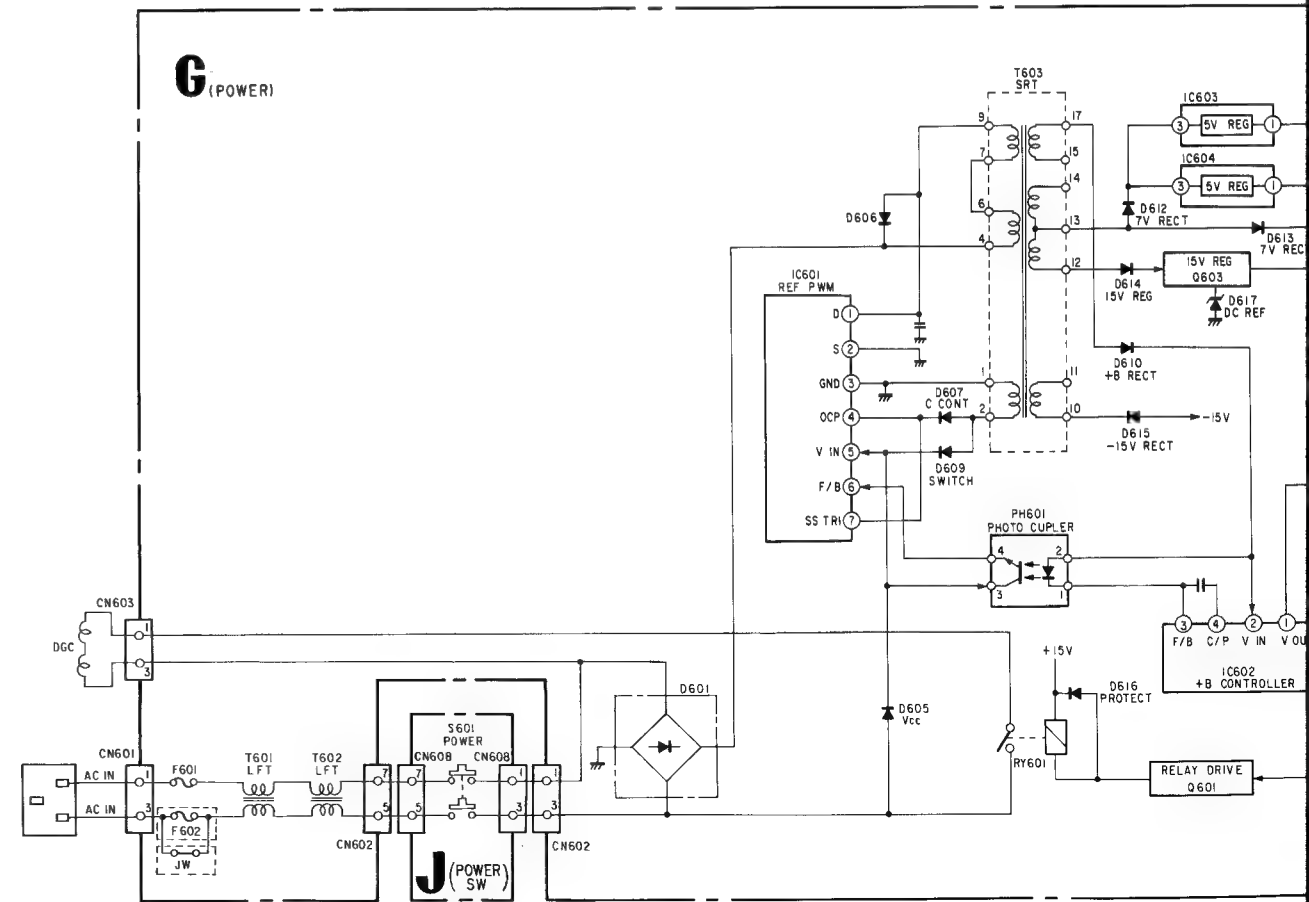

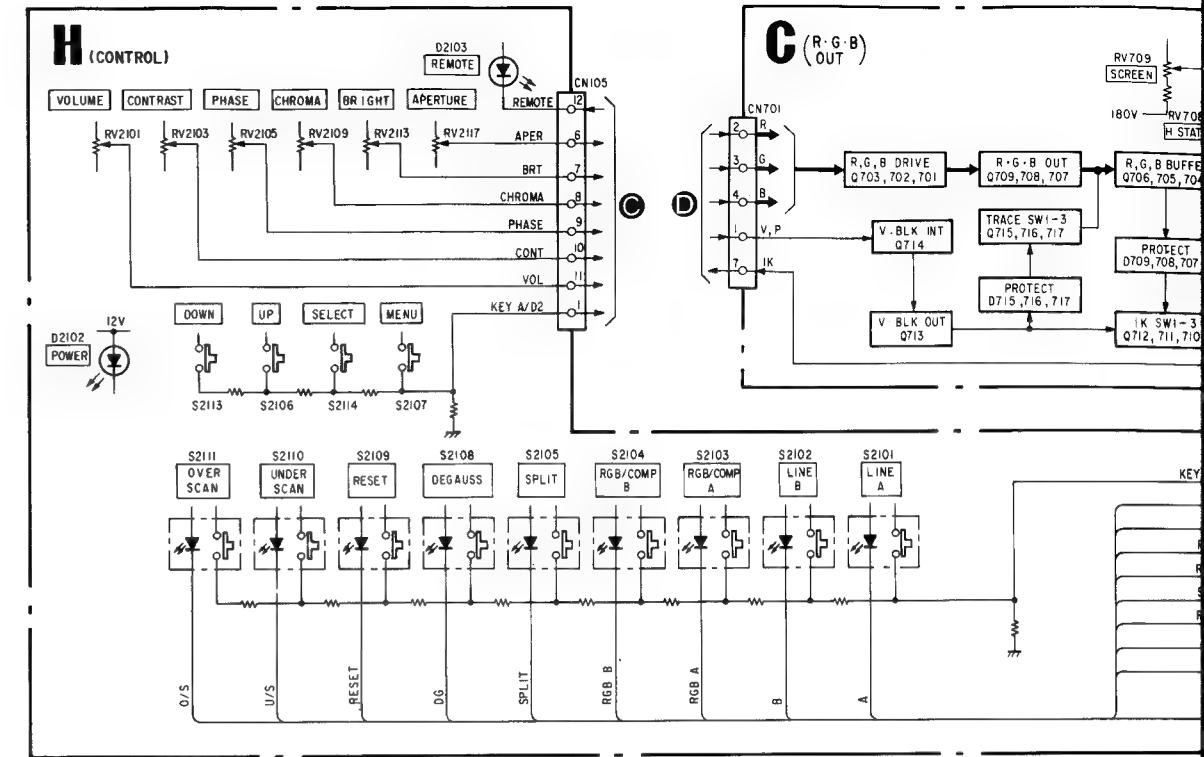

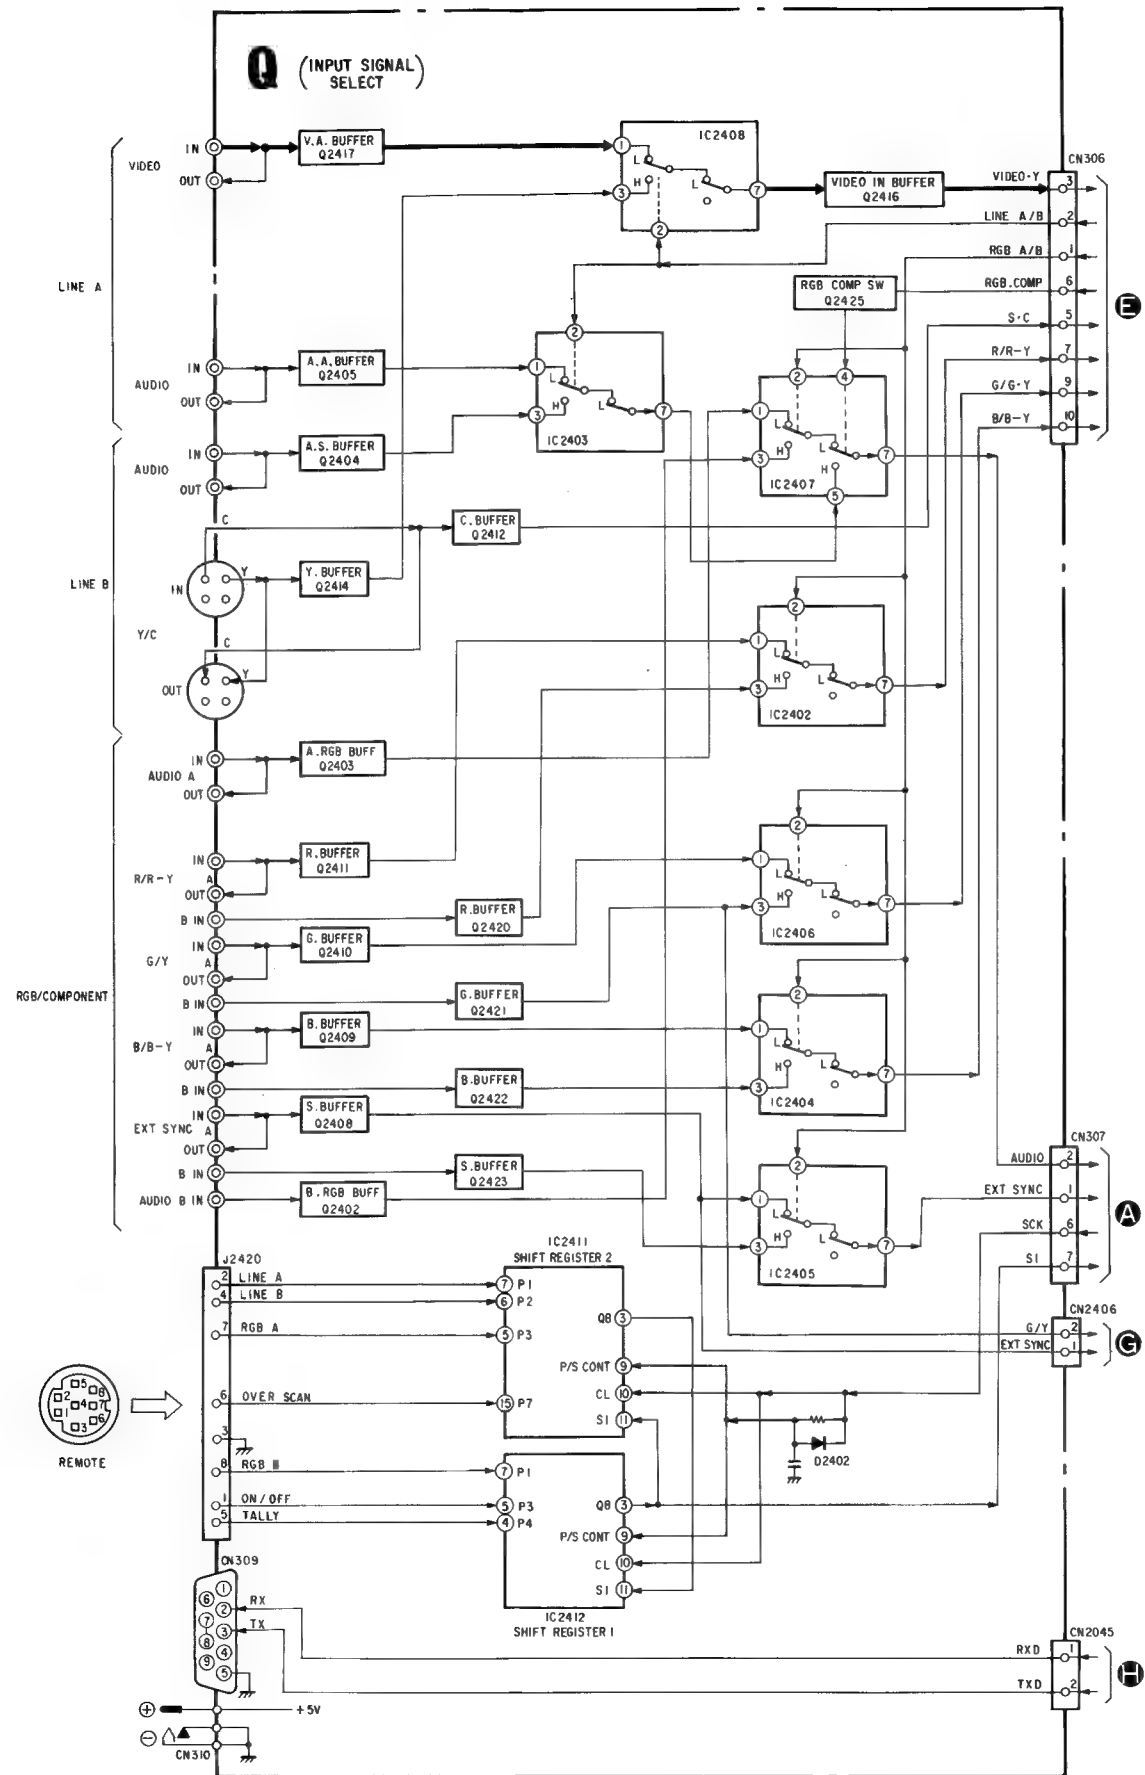

## 6-1. BLOCK DIAGRAMS (1)

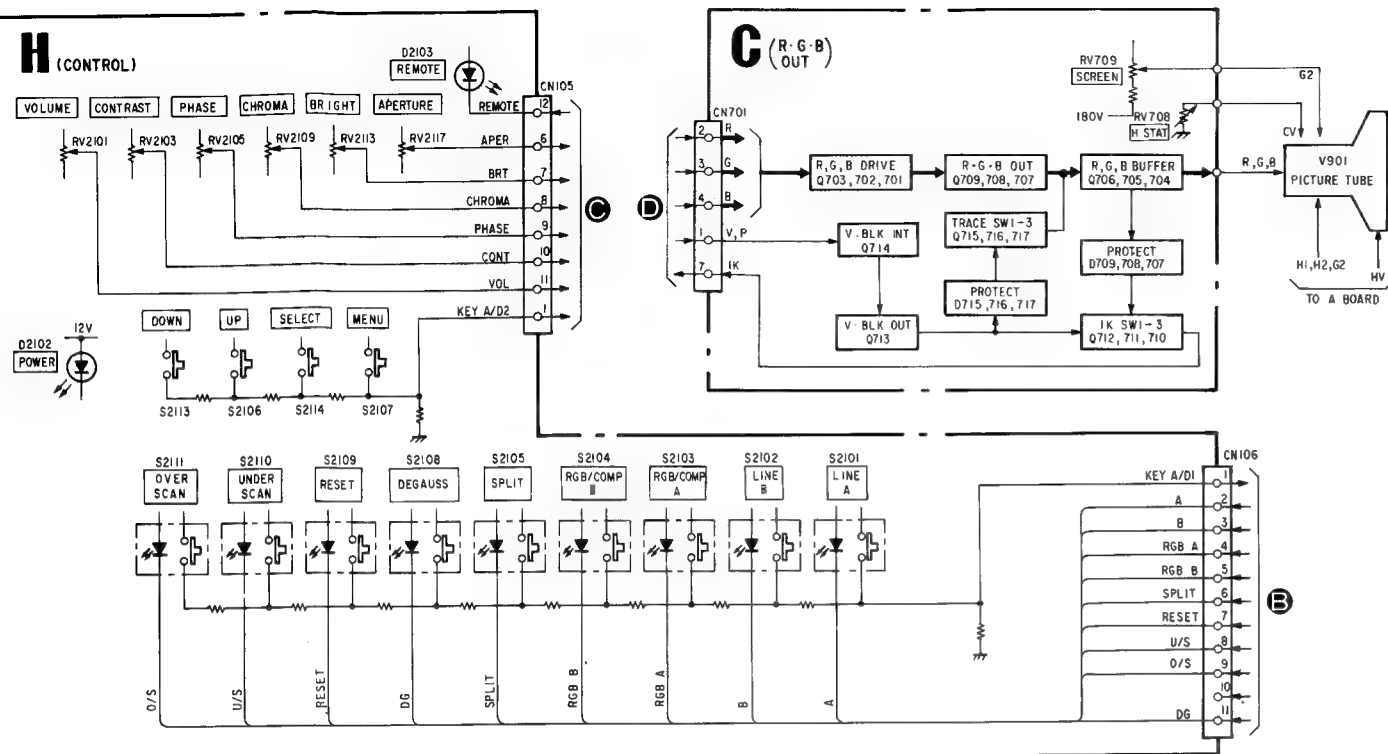

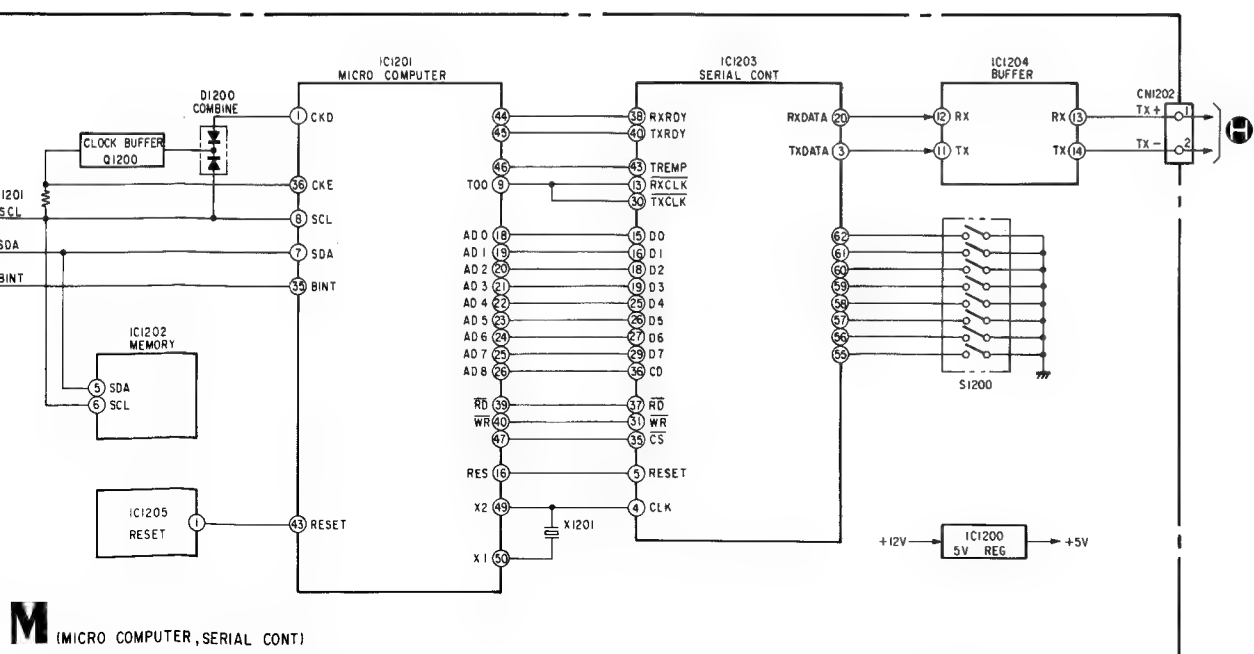

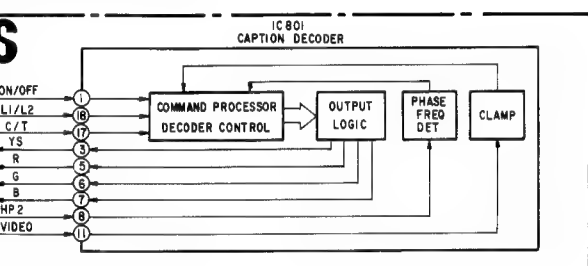

## BLOCK DIAGRAMS (2)

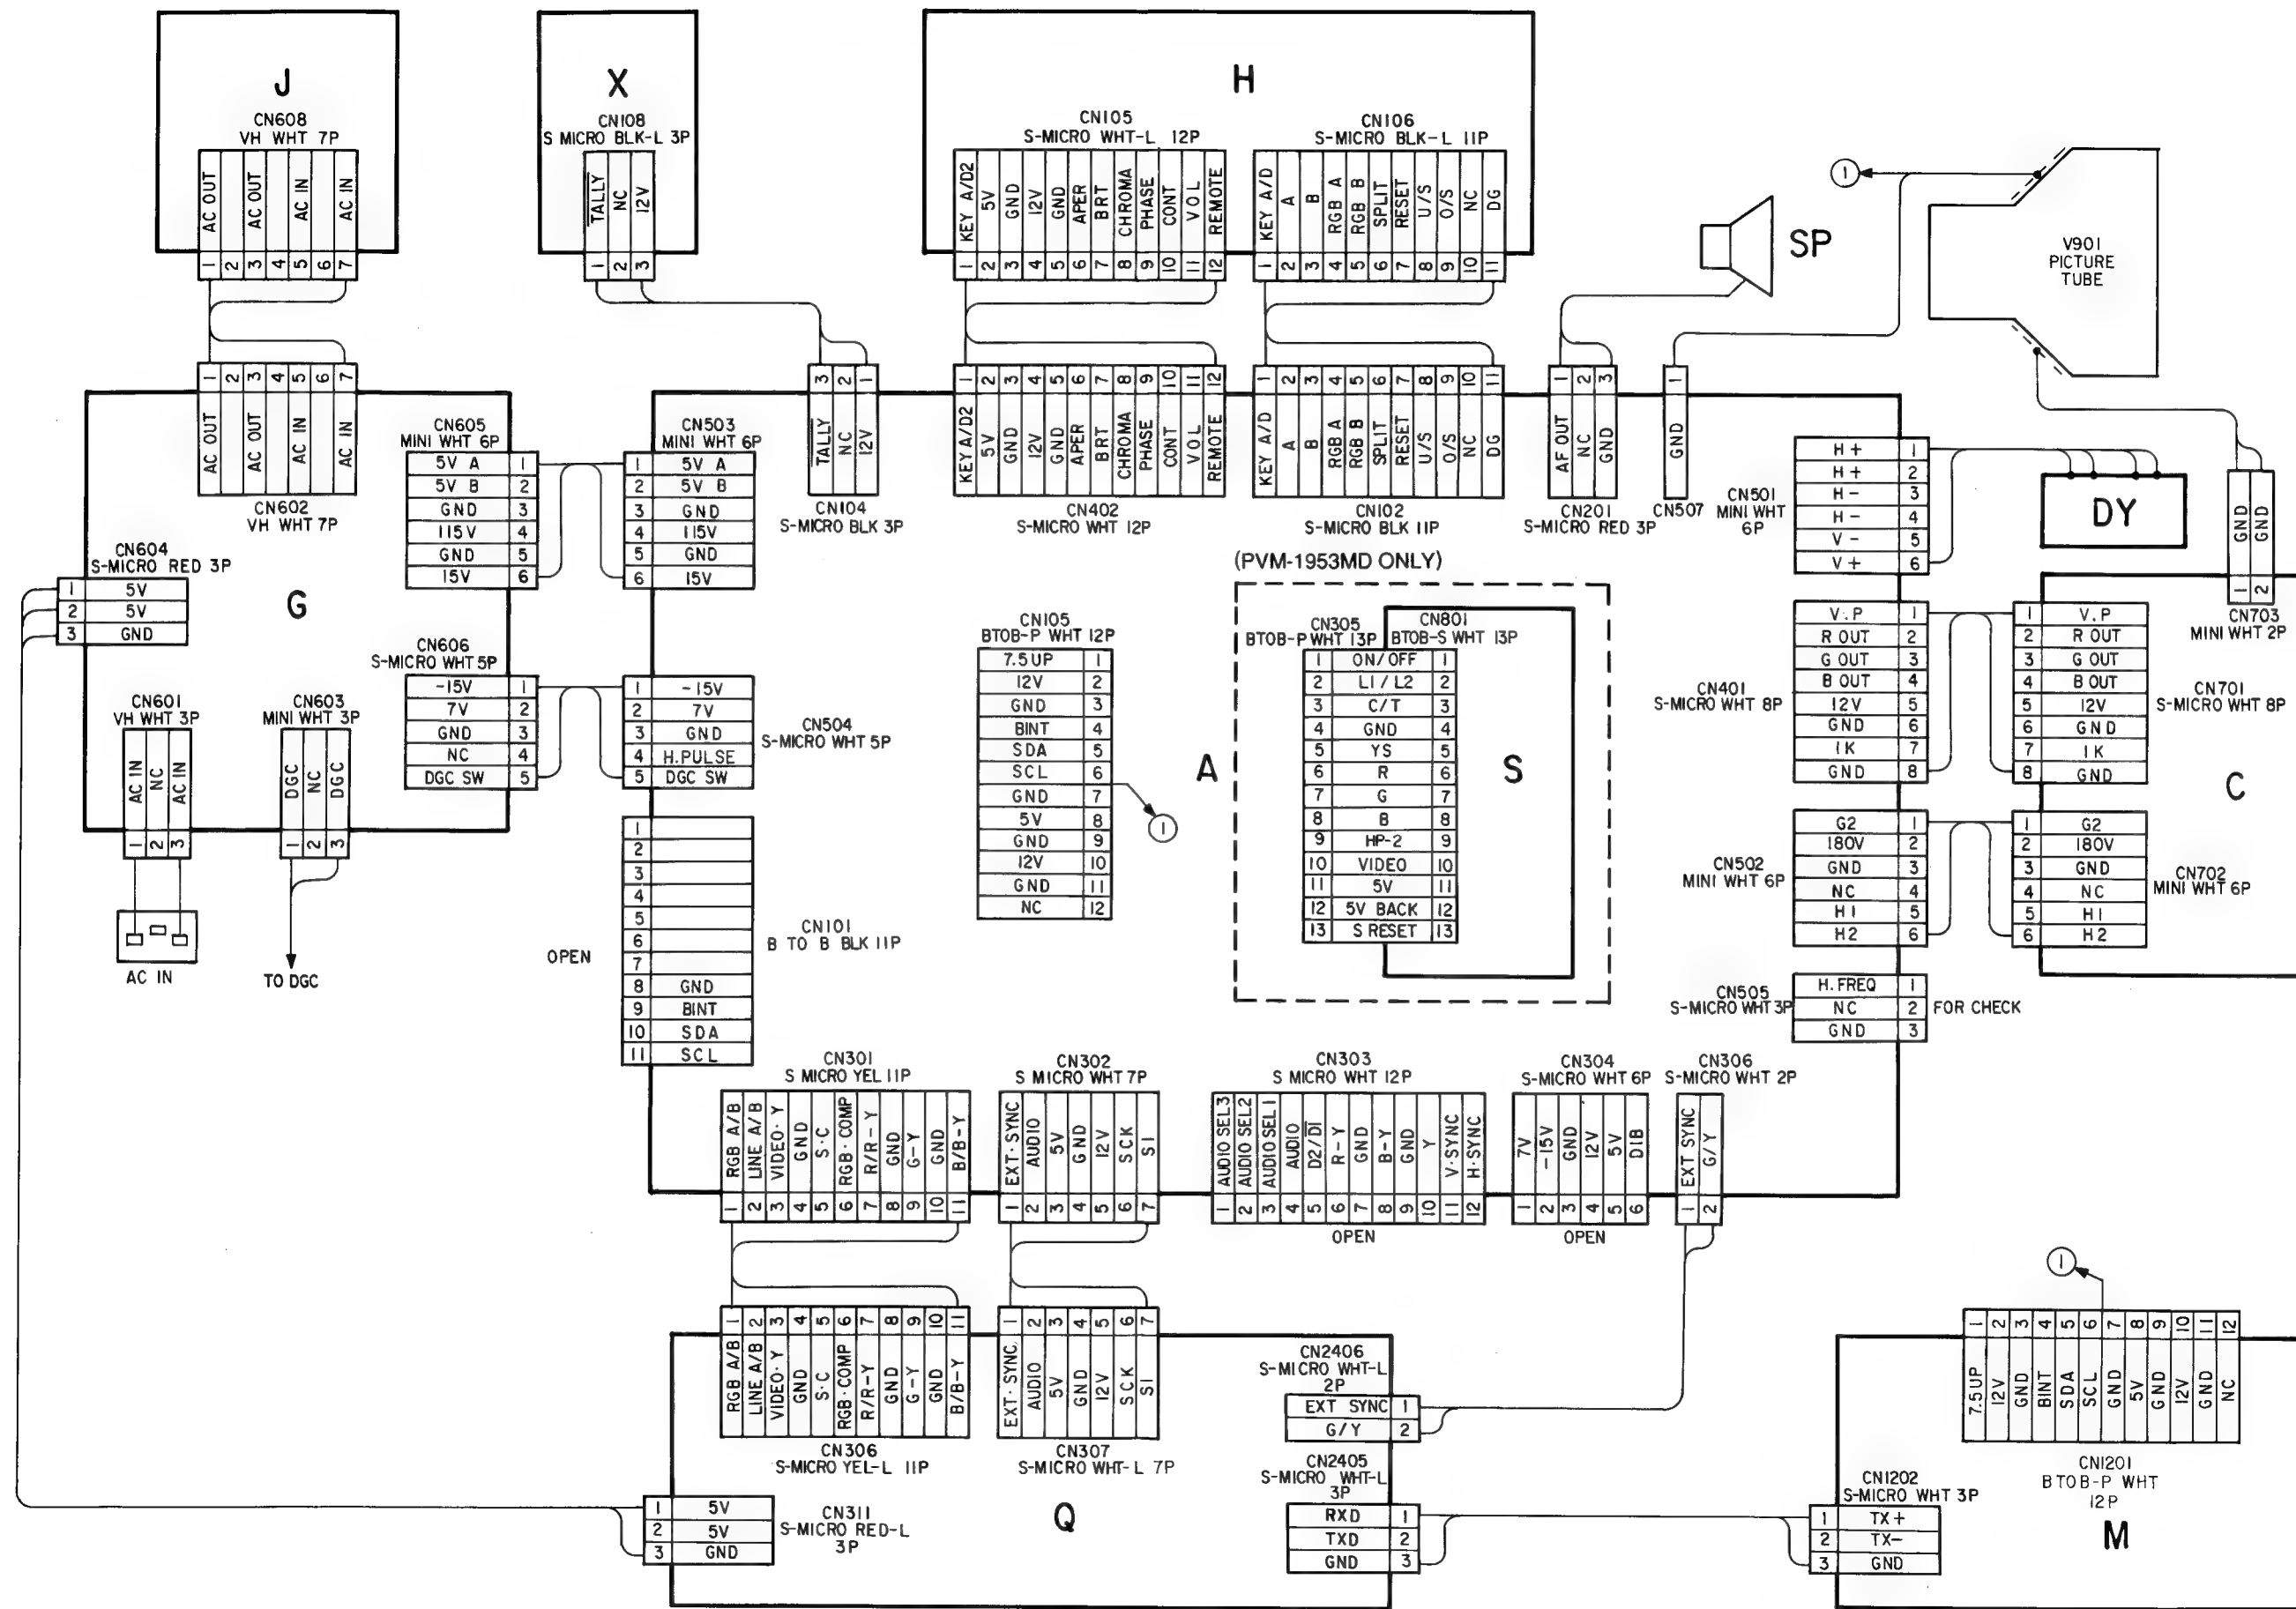

(PVM-1953MD ONLY)

## 6-2. FRAME SCHEMATIC DIAGRAMS

### 6-3. CIRCUIT

#### 6-4. PRINTED

**Note:**

- All capacitors are not indicated except where otherwise noted.
- All electrolytics are indicated by the letter "E".
- All resistors are indicated by the letter "R".
- $k\Omega = 1000\Omega$ ,  $M\Omega = 10^6\Omega$
-  : non-inductive
-  : fusible
-  : interconnect
-  : panel
- All variable and potentiometer values are indicated by the letter "P" and otherwise noted.
- The components have been carefully checked regarding X-ray fluorescence. Should replacement be required, the component should be replaced with an equivalent.
- When replacing components, make the adjustments indicated on the component label. The component specified value is the factory setting. When replacing a component, make the adjustment.

P
IC500, IC507 C506, C512, R506, R508, R519, R551, T501 ..... IC602, C603

**Note:** The  part

### 6-3. CIRCUIT BOARDS LOCATION

### 6-4. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

#### Note:

- All capacitors are in  $\mu\text{F}$  unless otherwise noted. pF:  $\mu\text{F}$  50WV or less are not indicated except for electrolytics.
- All electrolytics are in 50V unless otherwise specified.
- All resistors are in ohms, 1/4W in resistance, 1/10W in chip resistance.  $k\Omega=1000\Omega$ ,  $M\Omega=1000k\Omega$
- : nonflammable resistor.
- : fusible resistor.
- : internal component.
- : panel designation and adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- The components identified by in this basic schematic diagram have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.
- When replacing components identified by , make the necessary adjustments indicated. If results do not meet the specified value, change the component identified by and repeat the adjustment until the specified value is achieved. (Refer to R1535, R1536 adjust on Page 36.)
- When replacing the part in below table, be sure to perform the related adjustment.

Part replaced ()	Adjustment ()
IC500, IC507, Q500, Q501, D501, D533, C506, C512, C513, C523, C549, C592, R506, R508, R515, R516, R517, R518, R519, R551, R1535, R1536, R1537, T501 .....(A BOARD) IC602, C603.....(G BOARD)	R1535, R1536 (HOLD-DOWN)

Note: The components identified by shading and mark are critical for safety. Replace only with part number specified.

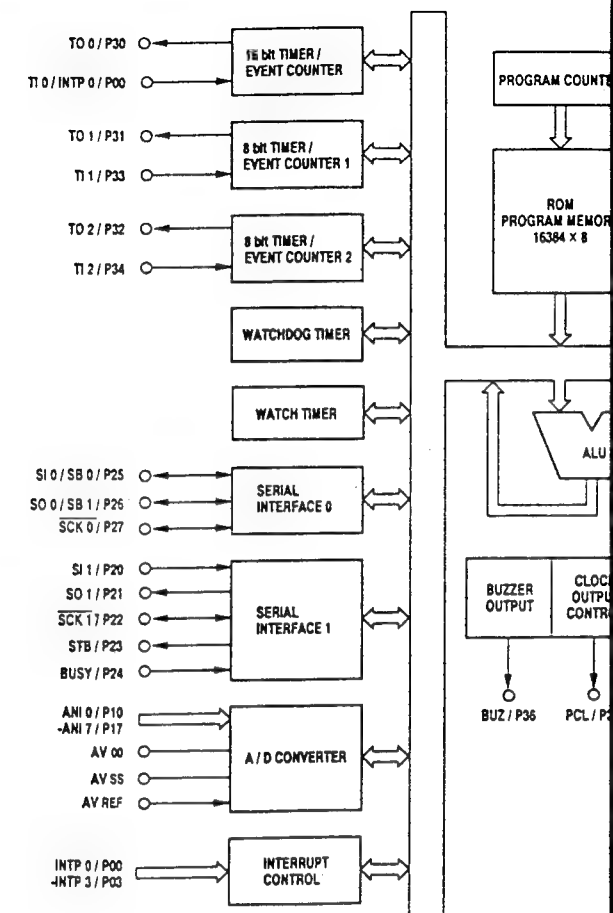

- All voltage are in V.
- Voltage are dc with respect to ground unless otherwise noted.
- Readings are taken with a color-bar signal input.
- Voltage variations may be noted due to normal production tolerances.
- : B + bus.
- : B - bus.
- : Signal path.
- No mark : with PAL color-bar signal is received or common voltage.
- For the respective voltage ratings in NTSC 3.58, S-VIDEO and ANALOG RGB modes, see the table.

Note:  
 • : Pattern from the side which enables seeing.  
 • : Pattern of the rear.

**NOTE:**  
 The circuit indicated as left contains high voltage of over 600 Vp-p. Care must be paid to prevent an electric shock in inspection or repairing.

## SECTION 7 EXPLODED VIEWS

### NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked "★" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

The components identified by shading and mark **▲** are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque **▲** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

# SECTION 8 ELECTRICAL PARTS LIST

A

## NOTE:

The components identified by shading and mark **A** are critical for safety.  
Replace only with part number specified.

Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

• Items marked " \* " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

• All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

## RESISTORS

• All resistors are in ohms  
• F : nonflammable

When indicating parts by reference number, please include the board name.

## CAPACITORS

## COILS

• MF :  $\mu$ F, PF :  $\mu$ F • MMH : mH, UH :  $\mu$ H

• The components identified by **A** in this manual have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.

• \* : Selected to yield optimum performance.

• There are some cases the reference number on one board overlaps on the other board. Therefore, when ordering parts by the reference number, please include the board name.

**A**

The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

**A**

• The components identified by **A** in this manual have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.

The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.
